

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 02-Apr-2026

1. Administrative & Study Identification

Study Title: An Observational Study to Evaluate the Real-World Clinical Management and Outcomes of ALK-Positive Advanced NSCLC Participants Treated With Alectinib **Official Title:** A Multicenter Non-Interventional Cohort Study to Evaluate the Real-World Clinical Management and Outcomes of Patients Diagnosed With ALK-Positive Advanced NSCLC Treated With Alectinib (ReAlec) **Short Title/Acronym:** ReAlec Study **Protocol Number:** M042122 **NCT Number:** NCT04764188 **Posting ID:** 513133533031845495 **Sponsor/Company Name:** Hoffmann-La Roche / Roche **Investigational Product:** Alectinib **Phase of Development:** Not Applicable (Observational Study) **Trial Status:** ACTIVE_NOT_RECRUITING (Active but not currently recruiting) **Medical Monitor:** Hoffmann-La Roche Clinical Operations Lead

2. Study Synopsis & Rationale

2.1 Study Objective Primary Objective: To characterize the clinical management and outcomes, including Progression-Free Survival (PFS), of participants diagnosed with anaplastic lymphoma kinase (ALK)-positive advanced non-small cell lung cancer (NSCLC) who are being treated with alectinib in real-world clinical practice. **Secondary Objectives:** To evaluate additional real-world clinical outcomes and treatment patterns for patients receiving alectinib in first-line and second-line settings.

2.2 Background & Rationale To generate robust real-world evidence regarding the clinical management and effectiveness of alectinib outside of controlled clinical trials in patients with ALK-positive advanced NSCLC. This observational approach ensures a thorough understanding of treatment outcomes, patient responses, and survival benefits in diverse, routine clinical settings.

3. Study Design & Methodology

3.1 Design Framework Study Type: Observational (Non-Interventional Cohort Study) **Control Type:** Single-arm (Multi-cohort: First-line and Second-line) **Blinding:** Open-label **Randomization:** N/A

3.2 Planned Enrollment & Duration Target \$N\$: 800 patients **Number of Sites:** Approximately 118 locations globally **Estimated Study Start:** 10-May-2021 **Estimated Primary Completion:** 10-May-2027

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria 1. Confirmed diagnosis of advanced NSCLC (stage IIIB, IIIC, IVA, or IVB) on or after the date of local approval for alectinib as first-line treatment and/or second-line treatment for ALK-positive advanced NSCLC and planned to receive treatment as per routine for at least one cycle (28 days) while on study. Age $\geq$ 18 years. 2. ALK-positive as confirmed by immunohistochemistry (IHC), fluorescent in situ hybridization (FISH), next generation sequencing (NGS), or other non-specified sequencing methods, documented prior to receiving treatment with an ALK inhibitor. 3. Cohort 1: Currently receiving, or planned to receive, treatment for ALK-positive advanced NSCLC with alectinib as first-line treatment; OR Cohort 2: Planned to receive treatment for ALK-positive advanced NSCLC with alectinib as second-line treatment. Participants with CNS metastases are eligible. 4. Able to be followed-up by participating site.

4.2 Exclusion Criteria 1. Participants not receiving alectinib for the treatment of ALK-positive advanced NSCLC according to standard of care and in line with local product information. 2. Participants not receiving the Roche studied medicinal product. 3. Participants who have received or are currently receiving alectinib as an investigational study drug in a clinical trial for the treatment of advanced NSCLC.

5. Intervention & Treatment Plan

5.1 Investigational Regimen Drug Name: Alectinib Trade Name: Alecensa ATC Code: L01ED03 EMA URL: https://www.ema.europa.eu/en/documents/product-information/alecensa-epar-product-information_en.pdf Dosage/Frequency: Alectinib administered in accordance with local clinical practice and local labeling. **Route of Administration:** Oral **Duration of Treatment:** Up to 4 years of follow-up for first-line treatment (Cohort 1) and up to 2 years of follow-up for second-line treatment (Cohort 2).

5.2 Concomitant & Prohibited Therapy Permitted: Standard of care therapies administered alongside alectinib in routine real-world clinical practice. **Prohibited:** Investigational ALK inhibitors or administration of alectinib as part of a separate investigational clinical trial.

6. Study Timeline & Visit Schedule

| Visit ID | Window (Days) | Key Activities/Procedures | | :---
| :--- | :--- | | **Screening** | Day -14 to 0 | Informed Consent (if applicable), ALK-positive confirmation (IHC/FISH/NGS), NSCLC diagnosis staging. | | **Baseline** | Day 0 | Enrollment, Documentation of first alectinib dose (real-world administration). | | **Interim** | Routine | Real-world clinical

follow-up according to local standard of care, disease progression assessment, survival tracking. | | **End of Study** | Year 2 or 4 | Final real-world outcomes data extraction, overall survival status. |

7. Outcome Measures (Endpoints)

7.1 Primary Endpoints 1. **Investigator-Confirmed Progression-Free Survival (PFS) According to the Local Standard of Care or per Response Evaluation in Solid Tumors (RECIST) - Cohort 1:** Measured from the first administration of alectinib to the date of first documentation of disease progression, or death due to any cause. 2. **Investigator-Confirmed PFS According to the Local Standard of Care or per RECIST - Cohort 2.** 3. **Choice of the Next Line of Treatment (LoT) Post-Alectinib.**

7.2 Secondary & Exploratory Endpoints 1. **Time to Loss of Clinical Benefit (TTLCB)** 2. **Overall Survival (OS)** 3. **Objective Response Rate (ORR):** Defined as a Complete Response (CR) or Partial Response (PR).

8. Safety & Adverse Event Reporting

Adverse Event (AE) Monitoring: Real-world safety tracking aligned with local pharmacovigilance and standard of care practices.

Serious Adverse Events (SAEs): Routine safety data collection as required for post-marketing observational studies and regulatory reporting. **Data Monitoring Committee (DMC):** N/A (Observational standard of care setting).

9. Statistical Analysis Plan (SAP) Summary

Analysis Populations: Real-world effectiveness and safety populations comprising Cohort 1 (first-line) and Cohort 2 (second-line). **Sample Size Justification:** $N=800$ to ensure robust observational data collection, allowing for meaningful real-world estimates of PFS and management patterns. **Handling of Missing Data:** Utilization of appropriate methods for observational real-world data (e.g., right-censoring for survival endpoints) to account for variable follow-up times in routine clinical practice.

10. Quality Assurance & Regulatory Compliance

GCP Compliance: This study will be conducted in accordance with Good Pharmacoepidemiology Practices (GPP), Good Clinical Practice (GCP) where applicable, and the Declaration of Helsinki.

Monitoring Plan: Source data verification and routine monitoring

of electronic health records/registries per the observational protocol. **Audit Trail:** Data collected via validated electronic data capture (EDC) systems subject to real-world database audits.

11. Study Identifiers & Governance

Primary ID: M042122 **Registry Number:** NCT04764188 **Posting ID:** 513133533031845495 **Sponsor/Lead Organization:** Hoffmann-La Roche / Roche **Study Title:** An Observational Study to Evaluate the Real-World Clinical Management and Outcomes of ALK-Positive Advanced NSCLC Participants Treated With Alectinib **Official Regulatory Title:** A Multicenter Non-Interventional Cohort Study to Evaluate the Real-World Clinical Management and Outcomes of Patients Diagnosed With ALK-Positive Advanced NSCLC Treated With Alectinib (ReAlec)

12. Clinical Framework (NSCLC Specific)

Primary Condition: ALK-Positive Advanced Non-Small Cell Lung Cancer (NSCLC) **Diagnosis Threshold:** Advanced NSCLC (stage IIIB, IIIC, IVA, or IVB) with ALK-positive confirmation **Medical Methodology:** Targeted Therapy / ALK Inhibition **Optimization Target:** Investigator-Confirmed Progression-Free Survival (PFS)

13. Study Procedures & Methodology

Management Pathway: Local standard of care clinical pathway for ALK-positive advanced NSCLC **Education Protocol (HCP):** Local product labeling and real-world prescribing guidelines **Education Protocol (Patient):** Routine patient counseling per institutional standards **Quality Audit Mechanism:** Real-world data extraction and electronic medical record (EMR) validation

14. Observation & Follow-Up Schedule

Total Duration: Up to 4 years (Cohort 1) and up to 2 years (Cohort 2) **Onsite Visit Cadence:** Determined by real-world clinical practice and individual patient needs **Remote Monitoring Frequency:** Data extraction at protocol-specified intervals **Checklist Review Interval:** Routine evaluation per standard oncology institutional protocols

15. Sign-off & Approval
