

1. Administrative & Study Identification

Full Study Title: A Safety Study of Sacubitril/Valsartan in Japanese Pediatric Patients With Heart Failure Due to Systemic Left Ventricle Systolic Dysfunction Who Have Completed CLCZ696B2319E1 Study **Short Title/Acronym:** CLCZ696B2319E2 / PANORAMA-HF OLE Extension **Protocol Number:** CLCZ696B2319E2 **NCT Number:** NCT06149104 **Posting ID:** 60413023627311467 **Sponsor/Company Name:** Novartis **Investigational Product:** Sacubitril/Valsartan (ATC Code: C09CA03; Trade Names: Valturna, Exforge HCT, Exforge, Diovan, Diovan HCT, Byvalson, Entresto) **Phase of Development:** Phase 3 **Trial Status:** Completed **Medical Monitor:** Novartis Clinical Operations Lead / Medical Monitor

2. Study Synopsis & Rationale

2.1 Study Objective Primary Objective: To collect additional safety information of sacubitril/valsartan and to provide post-trial access to the medication for eligible Japanese pediatric patients who completed the CLCZ696B2319E1 (PANORAMA-HF OLE) study. **Secondary Objectives:** There are no secondary or exploratory objectives for this study.

2.2 Background & Rationale This study serves as a multicenter, open-label extension to evaluate the long-term safety and tolerability of sacubitril/valsartan in Japanese pediatric patients with systemic left ventricular systolic dysfunction. The study aims to provide uninterrupted post-trial access to the study drug for participants who successfully completed the preceding trial, bridging the gap until the pediatric formulation (film-coated granules in capsule) becomes commercially available on the market in Japan.

3. Study Design & Methodology

3.1 Design Framework Study Type: Interventional **Control Type:** Single-arm **Blinding:** Open-label **Randomization:** N/A (Extension Study)

3.2 Planned Enrollment & Duration Trial Status: Completed **Target Enrollment:** 8 Japanese patients **Number of Sites:** Multicenter (Japan) **Estimated Study Start:** December 2023 **Estimated Primary Completion:** August 2024 (Database Lock)

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria 1. Male or female, inpatient or outpatient, and < 18 years of age (at the time of signing informed consent). 2. Patients who have successfully completed the PANORAMA-HF OLE (CLCZ696B2319E1) study and are able to be safely enrolled into this study as judged by the Investigator. 3. Signed informed consent, as well as assent at an appropriate age, must be obtained prior to participation.

4.2 Exclusion Criteria 1. Patients who permanently discontinued the study drug treatment during the PANORAMA-HF OLE study. 2. Renal vascular hypertension (including renal artery stenosis) or patients with a history of angioedema. 3. Any medical condition(s) that may put the patient at risk in the Investigator's opinion, or that the Investigator deems unsuitable for the study, or patients whose parents/legal guardians do not give consent or allow the child to give assent, or inability to follow instructions or comply with follow-up procedures.

5. Intervention & Treatment Plan

5.1 Investigational Regimen Dosage/Frequency: The starting dose level remains the same as the dose at the end of the PANORAMA-HF OLE study, or it may be changed at the discretion of the Investigator based on the participant's clinical condition. **Route of Administration:** Oral (Pediatric formulation) **Duration of Treatment:** Actual duration is variable and depends on the timing of the sacubitril/valsartan pediatric formulation becoming commercially available in Japan.

5.2 Concomitant & Prohibited Therapy Permitted: Standard of care background therapy for pediatric heart failure. **Prohibited:** Concomitant treatments posing a significant safety risk or contraindicated with sacubitril/valsartan (e.g., ACE inhibitors without proper washout, owing to angioedema risk).

6. Study Timeline & Visit Schedule

Visit ID	Window (Days)	Key Activities/Procedures	:---
:---	:---	Baseline	Day 1 Enrollment (occurring on the same day as the End of Study visit of CLCZ696B2319E1), Informed Consent/Assent
Interim	Scheduled Intervals	Safety monitoring, AE/AESI tracking, dose adjustments as medically appropriate	End of Study Variable Final safety follow-up, physical examination, transitioning to commercial pediatric formulation

7. Outcome Measures (Endpoints)

7.1 Primary Endpoint Definition: Number of Participants With Treatment Emergent Adverse Events (AEs) and Serious Adverse Events (SAEs): Number of participants with treatment emergent adverse events (any AE regardless of seriousness), and SAEs.

Measurement Method: Clinical evaluations, ongoing physical examinations, and laboratory monitoring focusing on factors like renal function and long-term effects on bone growth and mineralization to collect additional safety information of sacubitril/valsartan.

7.2 Secondary & Exploratory Endpoints None.

8. Safety & Adverse Event Reporting

Adverse Event (AE) Monitoring: Standard AE collection during visits, specifically tracking protocol-defined AESIs such as long-term effects on bone growth and mineralization in the pediatric population. **Serious Adverse Events (SAEs):** Evaluated and reported per regulatory timelines and standard pharmacovigilance procedures. **Data Monitoring Committee (DMC):** Continuous remote monitoring of site data and risk assessment performed by a centralized Novartis central analytics organization.

9. Statistical Analysis Plan (SAP) Summary

Analysis Populations: Safety Set (all enrolled participants receiving at least one open-label dose). **Sample Size**

Justification: No formal statistical power calculation; target size ($N=8$) is strictly based on the eligible pool of completers from the prior PANORAMA-HF OLE study in Japan. **Handling of**

Missing Data: Descriptive safety statistics with no formal imputation for missing data, given the primary safety objective.

10. Quality Assurance & Regulatory Compliance

GCP Compliance: This study will be conducted in accordance with Good Clinical Practice (GCP) and the Declaration of Helsinki.

Monitoring Plan: Continuous remote monitoring combined with ongoing onsite source data verification performed by clinical research associates (CRAs). **Audit Trail:** Proper maintenance of source documentation, query resolution, and secure eCRF locking prior to database lock.

11. Study Identifiers & Governance

Primary ID: CLCZ696B2319E2 **Registry Number:** NCT06149104 **Posting ID:** 60413023627311467 **Sponsor/Lead Organization:** Novartis **Study Title:** A Safety Study of Sacubitril/Valsartan in Japanese Pediatric Patients With Heart Failure Due to Systemic Left Ventricle Systolic Dysfunction Who Have Completed CLCZ696B2319E1 Study **Official Regulatory Title:** A Multicenter, Open-label Study to Collect the Safety Information of Sacubitril/Valsartan in Japanese Pediatric Patients With Heart Failure Due to Systemic Left Ventricle Systolic Dysfunction Who Have Completed CLCZ696B2319E1 Study

12. Clinical Framework (Heart Failure Specific)

Primary Condition: Heart Failure (Due to Systemic Left Ventricle Systolic Dysfunction) **Diagnosis Threshold:** Successful completion of the preceding CLCZ696B2319E1 trial **Medical Methodology:** Open-label extension providing post-trial investigational drug access **Optimization Target:** Safe maintenance and monitoring of sacubitril/valsartan therapy

13. Study Procedures & Methodology

Management Pathway: Open-label continuation of sacubitril/valsartan **Education Protocol (HCP):** Site instructions for pediatric dose administration and AESI tracking **Education Protocol (Patient):** Informed consent and age-appropriate assent administration **Quality Audit Mechanism:** Ongoing remote source data verification and risk assessment by centralized clinical teams

14. Observation & Follow-Up Schedule

Total Duration: Variable (until the drug is available on the Japanese market) **Onsite Visit Cadence:** Standard follow-up intervals for pediatric heart failure management **Remote Monitoring Frequency:** Continuous remote data and risk monitoring **Checklist Review Interval:** Regular eCRF and source document verification by study monitors
