

1. Administrative & Study Identification

Full Study Title: Open Label, Multicenter, Real World Practice of Durvalumab (Imfinzi PMS)
Short Title/Acronym: Imfinzi PMS
Protocol Number: D4194R00004
NCT Number: NCT04068168 **Sponsor Name:** AstraZeneca **Investigational Product:** Durvalumab (Imfinzi) **Phase of Development:** Phase N/A (Observational / Post-Marketing Surveillance) **Medical Monitor:** AstraZeneca Clinical Operations Lead

2. Study Synopsis & Rationale

2.1 Study Objective **Primary Objective:** To assess the safety of Imfinzi for patients with non-small cell lung cancer (NSCLC) or small cell lung cancer (SCLC) treated with Imfinzi under the approved indication in Korea.
Secondary Objectives: To assess the efficacy of Imfinzi for patients with NSCLC or SCLC treated with Imfinzi under the approved indication in Korea.

2.2 Background & Rationale To evaluate the safety and efficacy of Imfinzi (durvalumab) in a real-world setting in patients with NSCLC, SCLC, and Biliary Tract Cancer receiving treatment under the approved indications. This post-marketing surveillance study is conducted to provide necessary real-world evidence of the drug's safety profile and clinical benefits in a broad patient population outside of strictly controlled clinical trials.

3. Study Design & Methodology

3.1 Design Framework **Study Type:** Observational (Real-World Practice / Post-Marketing Surveillance) **Control Type:** Single-arm
Blinding: Open-label **Randomization:** N/A

3.2 Planned Enrollment & Duration **Target \$N\$:** 712 participants
Number of Sites: Multicenter (Korea) **Estimated Study Start:** 30-Jan-2020 **Estimated Primary Completion:** 27-Dec-2024 (Actual)

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria 1. Eligible for Imfinzi treatment according to the approved label. 2. Patients with NSCLC or SCLC. 3. Provision of signed and dated written informed consent by the patient or legally acceptable representative.

4.2 Exclusion Criteria 1. History of hypersensitivity to excipients of Imfinzi or to drugs with a similar chemical structure or class to Imfinzi. 2. Prior exposure to any anti-PD-1 or anti-PD-L1 inhibitors, including Imfinzi. 3. Pregnancy and/or breast feeding. 4. Current participation in any interventional trial. 5. Other off-label indications according to the approved label.

5. Intervention & Treatment Plan

5.1 Investigational Regimen Dosage/Frequency: Administered according to the locally approved label in Korea. **Route of Administration:** Intravenous (IV). **Duration of Treatment:** According to the approved label and standard of care until disease progression, unacceptable toxicity, or other standard discontinuation criteria.

5.2 Concomitant & Prohibited Therapy Permitted: Standard of care therapies for NSCLC/SCLC per real-world clinical practice. **Prohibited:** Prior exposure to anti-PD-1 or anti-PD-L1 inhibitors; concurrent participation in interventional trials; off-label indications.

6. Study Timeline & Visit Schedule

Visit ID	Window (Days)	Key Activities/Procedures
1	-14 to 0	Informed Consent, Eligibility Assessment, Medical History
2	0	Initiation of Imfinzi treatment per approved label
3	Interim	Routine Care Real-world safety and efficacy assessments per standard of care
4	End of Study	Upon Discontinuation Treatment discontinuation assessment, survival follow-up

7. Outcome Measures (Endpoints)

7.1 Primary Endpoint Definition: Assessment of safety, including Adverse Events (AEs), Serious Adverse Events (SAEs), Adverse Drug Reactions (ADRs), Serious Adverse Drug Reactions (SADRs), Adverse Events of Special Interest (AESI), Adverse Events leading to discontinuation (DAE), and fatal AEs; Dose interruptions; Duration of treatment; Reason for treatment discontinuation. **Measurement Method:** Real-world clinical monitoring, pharmacovigilance tracking, and standard medical practice observation.

7.2 Secondary & Exploratory Endpoints * Progression-free survival (PFS). * Objective response rate (ORR). * Duration of response (DoR).

8. Safety & Adverse Event Reporting

Adverse Event (AE) Monitoring: Assessed during routine clinical practice (AE, SAE, ADR, SADR, AESI, etc.). **Serious Adverse Events (SAEs):** Reported according to standard post-marketing surveillance guidelines (typically within 24 hours). **Data Monitoring Committee (DMC):** Internal safety monitoring mechanisms and pharmacovigilance teams managed by AstraZeneca.

9. Statistical Analysis Plan (SAP) Summary

Analysis Populations: Safety analysis set (all patients who received at least one dose of Imfinzi). **Sample Size Justification:** Target enrollment of 712 participants is based on the requirements for real-world post-marketing surveillance observation in Korea. **Handling of Missing Data:** Standard observational study methods and real-world data analysis conventions applied.

10. Quality Assurance & Regulatory Compliance

GCP Compliance: This study will be conducted in accordance with Good Clinical Practice (GCP), real-world data collection guidelines, and the Declaration of Helsinki. **Monitoring Plan:** Standard post-marketing surveillance (PMS) and real-world data monitoring. **Audit Trail:** Electronic data capture and standardized pharmacovigilance reporting.

11. Study Identifiers & Governance

Primary ID: D4194R00004 **Registry Number:** NCT04068168 **Sponsor/Lead Organization:** AstraZeneca **Study Title:** Imfinzi PMS **Official Regulatory Title:** Open Label, Multicenter, Real World Practice of Durvalumab (Imfinzi PMS)

12. Clinical Framework (Lung Cancer Specific)

Primary Condition: Lung Cancer (NSCLC, SCLC) and Biliary Tract Cancer **Diagnosis Threshold:** Eligible for Imfinzi treatment according to the approved label **Medical Methodology:** Real-World Practice / Post-Marketing Surveillance (PMS) **Optimization Target:** Standard of care treatment response and safety observation

13. Study Procedures & Methodology

Management Pathway: Standard clinical pathway for NSCLC, SCLC, and Biliary Tract Cancer **Education Protocol (HCP):** Standard

product labeling and PMS training **Education Protocol (Patient):**
Informed consent and routine care counseling **Quality Audit**
Mechanism: Pharmacovigilance tracking and real-world data
monitoring

14. Observation & Follow-Up Schedule

Total Duration: Follow-up through treatment discontinuation and
standard post-marketing surveillance duration **Onsite Visit**
Cadence: As per standard of care for real-world practice **Remote**
Monitoring Frequency: N/A (based on real-world clinical visits)
Checklist Review Interval: Routine clinical assessment intervals

15. Sign-off & Approval
