

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 02-Apr-2026

1. Administrative & Study Identification

Full Study Title: A Study to Evaluate the Utilization, Effectiveness, and Quality of Life of Ozanimod in Participants With Ulcerative Colitis **Official Title:** Ulcerative Colitis in Subjects of Clinical Routine: A Four Year, Multicenter, Prospective, Non-Interventional Study to Evaluate Utilization, Effectiveness, and Quality of Life With Ozanimod **Short Title/ Acronym:** COLIBRI Study **Protocol Number:** IM047-027 **NCT Number:** NCT05382715 **Posting ID:** 832505362830036126 **Sponsor Name:** Bristol Myers Squibb **Trial Status:** TERMINATED (Study was terminated early) **Investigational Product:** Ozanimod (Zeposia®) - ATC Code: L04AA38 **Phase of Development:** Not Applicable (Observational / Non-Interventional Study) **Preferred UMLS Name:** Ozanimod Treatment of Ulcerative Colitis **Medical Monitor:** Bristol Myers Squibb Clinical Operations / Medical Affairs

2. Study Synopsis & Rationale

2.1 Study Objective Primary Objective: To monitor the use, effectiveness, and treatment persistence with Ozanimod (Zeposia®) as well as quality of life in participants undergoing treatment for moderate-to-severe ulcerative colitis (UC). **Secondary Objectives:** To evaluate clinical remission and clinical response rates, and assess real-world persistence, safety, and tolerability over the study duration.

2.2 Background & Rationale While Ozanimod is an approved S1P receptor modulator for moderate-to-severe UC, there is a need to understand its long-term impact outside of controlled clinical trials. This study generates real-world evidence (RWE) in Germany to evaluate how the drug is utilized in routine clinical practice, assessing its sustained clinical effectiveness and its impact on the quality of life of UC patients over a 4-year prospective observational period.

3. Study Design & Methodology

3.1 Design Framework Study Type: Observational (Prospective, Non-Interventional Study) **Control Type:** Single-arm **Blinding:** Open-label **Randomization:** N/A

3.2 Planned Enrollment & Duration Target **SN\$:** 175 participants **Number of Sites:** Multiple participating centers in Germany **Estimated Study Start:** 30-May-2022 **Estimated Primary Completion:** 31-May-2025

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria 1. Participants must have a confirmed diagnosis of moderate-to-severe Ulcerative Colitis. 2. Only Ozanimod (Zeposia®) naïve participants can be included into this prospective study. 3. Participants are suitable for therapy with Ozanimod (Zeposia®) according to the physician's recommendation (made before enrollment and independently of this Non-Interventional Study (NIS)). 4. Treatment with Ozanimod (Zeposia®) must be in-label and follow the approved Summary of Product Characteristics (SmPC).

4.2 Exclusion Criteria 1. Participants that have previously been treated with Ozanimod (Zeposia®). 2. Participants with mild Ulcerative Colitis (UC). 3. Participants with a stoma. 4. Participants participating in other clinical trials. 5. Participants with a planned surgical intervention and hospitalization due to UC. 6. Participants with any contraindications specified in the current version of the SmPC.

5. Intervention & Treatment Plan

5.1 Investigational Regimen Dosage/Frequency: Administered orally, dosed strictly according to the approved Summary of Product Characteristics (SmPC) for Ozanimod. **Route of Administration:** Oral **Duration of Treatment:** Up to 4 years of observation in a real-world setting.

5.2 Concomitant & Prohibited Therapy Permitted: Standard concomitant therapies for UC or other co-morbidities as dictated by routine clinical practice and the SmPC. **Prohibited:** Concurrent participation in other interventional clinical trials.

6. Study Timeline & Visit Schedule

(Note: As an observational study, visits align with standard clinical practice) | Visit ID | Window | Key Activities/Procedures | | :--- | :--- | :--- | | **Screening** | Routine | Assessment of eligibility, UC diagnosis confirmation, SmPC suitability | | **Baseline** | Day 0 | First dose of Ozanimod, documentation of baseline patient characteristics | | **Interim** | Weeks 10, 52 | Routine clinical assessment for Clinical Remission (Mayo Score), Quality of Life evaluation | | **End of Study** | Year 1-4 | Final real-world assessment, treatment persistence review, long-term safety |

7. Outcome Measures (Endpoints)

7.1 Primary Endpoint Definition: Number of participants with Clinical Remission, defined by a partial Mayo Score (pMayo) of ≤ 1 plus an RBS=0. **Measurement Method:** Clinical evaluation and patient-reported outcomes collected during routine clinical visits.

7.2 Secondary & Exploratory Endpoints * Persistence of therapy during the study course measured by the number of participants who are on continuous treatment. * Number of participants with Clinical Response. * Number of participants with Clinical Remission. * Assessment of Quality of Life (QOL) changes over the 4-year observational period.

8. Safety & Adverse Event Reporting

Adverse Event (AE) Monitoring: Standard pharmacovigilance reporting via routine clinical practice assessments. **Serious Adverse Events (SAEs):** Reported continuously in accordance with local regulatory guidelines and the sponsor's post-marketing safety protocols. **Data Monitoring Committee (DMC):** N/A (Non-interventional observational design).

9. Statistical Analysis Plan (SAP) Summary

Analysis Populations: All enrolled participants who are prescribed and receive at least one dose of Ozanimod in the real-world setting. **Sample Size Justification:** $N=175$ is based on expected regional prescription volumes and sufficient to capture real-world trends in the German cohort. **Handling of Missing Data:** Handled using standard methodologies for real-world evidence (RWE), reflecting natural attrition in routine clinical practice without strict imputation.

10. Quality Assurance & Regulatory Compliance

GCP Compliance: This study is conducted in accordance with Guidelines for Good Pharmacoepidemiology Practices (GPP) and local regulatory requirements for Non-Interventional Studies (NIS). **Monitoring Plan:** Periodic data collection from electronic medical records (EMR) and patient questionnaires across German study sites. **Audit Trail:** eCRF logging and tracking to ensure valid real-world data collection in compliance with privacy regulations.

11. Study Identifiers & Governance

Primary ID: IM047-027 **Registry Number:** NCT05382715 **Posting ID:** 832505362830036126 **Sponsor/Lead Organization:** Bristol Myers Squibb **Study Title:** A Study to Evaluate the Utilization, Effectiveness, and Quality of Life of Ozanimod in Participants With Ulcerative Colitis **Official Title:** Ulcerative Colitis in Subjects of Clinical Routine: A Four Year, Multicenter, Prospective, Non-Interventional Study to Evaluate Utilization, Effectiveness, and Quality of Life With Ozanimod

12. Clinical Framework (Disease Specific)

Primary Condition: Colitis, Ulcerative **Preferred UMLS Name:** Ozanimod Treatment of Ulcerative Colitis **Diagnosis Threshold:** Confirmed diagnosis requiring targeted systemic therapy **Medical Methodology:** Treatment with commercially available Ozanimod (Zeposia®) **Optimization Target:** Clinical Remission (partial pMayo score of ≤ 1 plus RBS = 0)

13. Study Procedures & Methodology

Management Pathway: Standard clinical routine for UC in Germany **Education Protocol (HCP):** Adherence to the approved SmPC guidelines **Education Protocol (Patient):** Routine clinical care instructions **Quality Audit Mechanism:** Periodic real-world data collection and treatment persistence tracking

14. Observation & Follow-Up Schedule

Total Duration: 4 years **Onsite Visit Cadence:** Routine clinical practice visits (e.g., Baseline, Week 10, Week 52, Year 2-4) **Remote Monitoring Frequency:** As per routine clinical standard of care **Checklist Review Interval:** Annually or per local clinical cadence

15. Sign-off & Approval

Role	Name	Signature	Date	:---	:---	:---	:---
