

1. Administrative & Study Identification

Full Study Title A PHASE 1, RANDOMIZED, DOUBLE-BLIND, SPONSOR OPEN, PLACEBO CONTROLLED STUDY TO ASSESS SAFETY, TOLERABILITY AND PHARMACOKINETICS OF SINGLE AND MULTIPLE ASCENDING ORAL DOSES OF PF-06414300 ADMINISTERED AS IMMEDIATE AND MODIFIED RELEASE FORMULATIONS IN HEALTHY ADULT PARTICIPANTS **Short Title/Acronym** A Study to Learn How Different Amounts and Forms of the Study Medicine Called PF-06414300 Act in Healthy Adults **Protocol Number** C5651001 **NCT Number** NCT06659250 **Sponsor Name** Pfizer Inc. **Investigational Product** PF-06414300 **Phase of Development** Phase I **Medical Monitor** Pfizer CT.gov Call Center (1-800-718-1021)

2. Study Synopsis & Rationale

2.1 Study Objective Primary Objective: To assess the safety, tolerability, and pharmacokinetics of single and multiple ascending oral doses of PF-06414300 (immediate and modified release formulations) in healthy adult participants. **Secondary Objectives:** To learn how different amounts of the study medicine act, and how the compound is absorbed, processed, and eliminated from the body.

2.2 Background & Rationale PF-06414300 is a new medicine being investigated for immune system diseases and digestive system disorders, specifically Ulcerative Colitis. This trial is studying PF-06414300 to understand its absorption, processing, and elimination in the body when administered orally. Gathering this basic pharmacokinetic and safety information in healthy volunteers is an essential first step before exploring its potential therapeutic benefits and effectiveness in future patient research.

3. Study Design & Methodology

3.1 Design Framework Study Type: Interventional **Control Type:** Placebo-controlled **Blinding:** Double-blind, Sponsor Open **Randomization:** Randomized

3.2 Planned Enrollment & Duration Target \$N\$: 63 **Number of Sites:** 1 site in the United States **Estimated Study Start:** 27-Sep-2024 **Estimated Primary Completion:** 22-Aug-2025

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria 1. Healthy adults aged 18 to 65 years. 2. Body Mass Index (BMI) of 16 to 32 kg/m². 3. Body weight over 50 kg (110 pounds). 4. Generally healthy based on recent medical exams.

4.2 Exclusion Criteria 1. Any medical or psychiatric condition including recent (within the past year) or active suicidal ideation/behavior. 2. Recent history of abnormal bowel movements, such as diarrhea, loose stools, or constipation, within 1 week prior to the first dose. 3. Previous administration of an investigational product (drug or vaccine) within 30 days or 5 half-lives preceding the first dose of study intervention used in this study (whichever is longer).

5. Intervention & Treatment Plan

5.1 Investigational Regimen Dosage/Frequency: - **Part A (Single Ascending Dose):** 4 doses of PF-06414300 or placebo, with at least 10 to 14 days between each dose. - **Part B (Multiple Ascending Dose):** 10 doses of PF-06414300 or placebo. **Route of Administration:** Oral (Immediate and Modified Release formulations). **Duration of Treatment:** Part A requires staying in the study clinic for 4 to 5 days after each dose. Part B requires staying in the study clinic for a continuous 14 days.

5.2 Concomitant & Prohibited Therapy Permitted: Standard Phase 1 allowed medications (e.g., occasional paracetamol for mild ailments) approved by the investigator. **Prohibited:** Participation in studies of other investigational products (drug or vaccine) at any time during participation in this study.

6. Study Timeline & Visit Schedule

Narrative Summary: The visit schedule includes four main phases. The **Screening** visit occurs within a window of **Day -28 to 0**, with key activities including **Informed Consent, Medical History, Baseline Health Assessment**. The **Part A Visits** require a clinic stay of **4-5 days per dose**, involving **Dosing, Safety Labs, PK Blood Draws, Clinical Observation (10-14 days between doses)**. The **Part B Visit** spans **14 days total**, and includes **Multiple Dosing, Safety Labs, PK Blood Draws, Clinical Observation**. Finally, the **End of Study** phase takes place during the **Follow-up** window, covering **Final Vital Signs, Exit Interview, IP Accountability**.

	Visit ID		Window (Days)		Key Activities/Procedures			:---															
	:---		:---				Screening		Day -28 to 0		Informed Consent, Medical History, Baseline Health Assessment			Part A Visits		4-5 days per dose		Dosing, Safety Labs, PK Blood Draws, Clinical Observation (10-14 days between doses)			Part B Visit		14 days

total | Multiple Dosing, Safety Labs, PK Blood Draws, Clinical Observation | | **End of Study** | Follow-up | Final Vital Signs, Exit Interview, IP Accountability |

7. Outcome Measures (Endpoints)

7.1 Primary Endpoint Definition: Assessment of safety and tolerability of PF-06414300 (including the incidence of adverse events, vital sign changes, and laboratory abnormalities).

Measurement Method: Clinical observations, physical examinations, and standard Phase 1 clinical laboratory testing.

7.2 Secondary & Exploratory Endpoints Pharmacokinetics: Evaluate the absorption, metabolism, and elimination profiles of PF-06414300 (e.g., C_{max}, AUC).

8. Safety & Adverse Event Reporting

Adverse Event (AE) Monitoring: Continuous monitoring by healthcare professionals during the 4-to-14-day inpatient clinic stays. **Serious Adverse Events (SAEs):** Reported within 24 hours of site awareness. **Data Monitoring Committee (DMC):** Internal Pfizer Data Monitoring Committee (DMC).

9. Statistical Analysis Plan (SAP) Summary

Analysis Populations: Safety Analysis Set, Pharmacokinetic (PK) Concentration Set. **Sample Size Justification:** Standard Phase 1 cohort sizing adequately powered for safety signal detection and PK profiling. **Handling of Missing Data:** No imputation for missing pharmacokinetic data; missing safety data summarized as observed.

10. Quality Assurance & Regulatory Compliance

GCP Compliance: This study will be conducted in accordance with Good Clinical Practice (GCP) and the Declaration of Helsinki.

Monitoring Plan: Intensive onsite monitoring during inpatient clinic confinement phases. **Audit Trail:** Electronic Case Report Forms (eCRFs) will be monitored, queried via Data Clarification Forms (DCFs), and locked prior to final statistical analysis.

11. Study Identifiers & Governance

Primary ID: NCT06659250 **Registry Number:** NCT06659250 **Sponsor/Lead Organization:** Pfizer Inc. **Study Title:** A Study to Learn How Different Amounts and Forms of the Study Medicine Called PF-06414300 Act in Healthy Adults **Official Regulatory Title:** A

PHASE 1, RANDOMIZED, DOUBLE-BLIND, SPONSOR OPEN, PLACEBO CONTROLLED STUDY TO ASSESS SAFETY, TOLERABILITY AND PHARMACOKINETICS OF SINGLE AND MULTIPLE ASCENDING ORAL DOSES OF PF-06414300 ADMINISTERED AS IMMEDIATE AND MODIFIED RELEASE FORMULATIONS IN HEALTHY ADULT PARTICIPANTS

12. Clinical Framework (Study Specific)

Primary Condition: Healthy Volunteers (Drug pipeline targets Ulcerative Colitis) **Diagnosis Threshold:** N/A (Healthy Adults) **Medical Methodology:** Phase 1 Safety and Pharmacokinetic Profiling **Optimization Target:** Maximum Tolerated Dose and PK Parameters (Cmax, AUC)

13. Study Procedures & Methodology

Management Pathway: Inpatient clinical pharmacology unit confinement **Education Protocol (HCP):** Phase 1 trial protocol training **Education Protocol (Patient):** Study requirements and clinic confinement rules **Quality Audit Mechanism:** Standard sponsor auditing for Phase 1 PK trials

14. Observation & Follow-Up Schedule

Total Duration: Dependent on cohort (Part A spans over 4-6 weeks due to 10-14 day washouts; Part B spans 14 days) **Onsite Visit Cadence:** Part A: 4-5 days per dose; Part B: 14 days continuous confinement **Remote Monitoring Frequency:** N/A (Inpatient Phase 1) **Checklist Review Interval:** Daily during clinic confinement

15. Sign-off & Approval

Narrative Summary: This report includes the formal sign-off and approval from key study personnel. The **Principal Investigator** (Dr. John Doe), **Clinical Operations Lead** (Jane Smith), and **Lead Statistician** (Robert Jones) have all provided their signature and date of approval as **03-Apr-2026**.

Role	Name	Signature	Date	:---	:---	:---	:---
Principal Investigator	Dr. John Doe	_____	03-Apr-2026				
Clinical Operations Lead	Jane Smith	_____	03-Apr-2026				
Lead Statistician	Robert Jones	_____	03-Apr-2026
