

1. Administrative & Study Identification

Full Study Title: Evaluation of Treatment Satisfaction and KarXT Utilization Registry (RESKU) **Short Title/Acronym:** RESKU (Evaluation of Treatment Satisfaction and KarXT Utilization Registry) **Protocol Number:** CN012-0066 **NCT Number:** NCT07101094 **Posting ID:** 898655007883087458 **Trial Status:** RECRUITING **Sponsor/Company Name:** Bristol Myers Squibb **Investigational Product:** xanomeline and trospium chloride (X/T) / KarXT **Phase of Development:** Not Applicable (Observational / Registry) **Medical Monitor:** BMS Clinical Trials Contact Center

2. Study Synopsis & Rationale

2.1 Study Objective Primary Objective: To understand treatment preference and satisfaction among adults with schizophrenia in the United States who are prescribed xanomeline and trospium chloride (X/T) therapy. **Secondary Objectives:** To evaluate real-world utilization patterns, adherence, and additional patient-reported outcomes over the course of XT treatment in a standard clinical setting.

2.2 Background & Rationale To address the gap in real-world data regarding patient experience and treatment satisfaction in individuals with schizophrenia initiating xanomeline and trospium chloride (XT). This registry aims to collect prospective data on medication preference and satisfaction (using the POM and MSQ tools) to better understand the patient journey and real-world utilization of this novel therapeutic option.

3. Study Design & Methodology

3.1 Design Framework Study Type: Observational (Registry) **Control Type:** Single-arm (Cohort) **Blinding:** Open-label **Randomization:** N/A (Non-Probability Sample)

3.2 Planned Enrollment & Duration Targeted Enrollment (\$N\$): 300 evaluable patients **Number of Sites:** Multicenter within the United States **Estimated Study Start:** 22-Sep-2025 **Estimated Primary Completion:** 31-Jan-2029

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria 1. Aged ≥ 18 years at index date. 2. Have a confirmed diagnosis of schizophrenia before index date. 3.

Receipt of an initial prescription order for xanomeline and trospium chloride (XT) and plan to fill and initiate such therapy. 4. Provide a signed and dated Institutional Review Board (IRB)/Independent Ethics Committee (IEC)-approved written informed consent form (ICF) in accordance with regulatory, local, and institutional guidelines. 5. Agree to use an electronic device to record, or provide paper entry of, patient-reported outcomes (in English or Spanish). 6. English or Spanish speaking.

4.2 Exclusion Criteria 1. Participation in an interventional study within the last 30 days or plan to participate in such study at the time of eligibility screening. 2. Evidence of use of XT prior to time of eligibility screening.

5. Intervention & Treatment Plan

5.1 Investigational Regimen Drug Name: xanomeline and trospium (Trade Names for trospium: Sanctura) **ATC Code:** G04BD09 **Dosage/Frequency:** Xanomeline and trospium chloride (X/T) therapy prescribed and administered according to the product label. **Route of Administration:** Oral. **Duration of Treatment:** Prospective observational follow-up period up to 6 months (and beyond) for primary outcome evaluation.

5.2 Concomitant & Prohibited Therapy Permitted: Routine care and concomitant medications as prescribed by the treating healthcare provider in a real-world setting. **Prohibited:** Concurrent participation in another interventional clinical trial.

6. Study Timeline & Visit Schedule

Visit ID	Window (Days)	Key Activities/Procedures
Screening/Index	Day 0	Informed Consent, Eligibility Confirmation, Schizophrenia Diagnosis Verification, Initial XT Prescription
Baseline	Day 0	Baseline Patient-Reported Outcomes (Medication Satisfaction Questionnaire - MSQ)
Month 1	Week 4 \$\\pm\$ Window	Treatment Satisfaction (MSQ), Medication Preference (POM)
Month 3	Week 12 \$\\pm\$ Window	Treatment Satisfaction (MSQ), Medication Preference (POM)
Month 6	Week 24 \$\\pm\$ Window	Treatment Satisfaction (MSQ), Medication Preference (POM)

7. Outcome Measures (Endpoints)

7.1 Primary Endpoint Definition: - Participant medication preference as assessed by the Preference of Medication (POM) questionnaire at Month 1, Month 3, and Month 6. - Participant treatment satisfaction as assessed by the Medication Satisfaction Questionnaire (MSQ) at Baseline, Month 1, Month 3, and Month 6.

Measurement Method: Electronic device recording or paper entry of Patient-Reported Outcomes (PROs).

7.2 Secondary & Exploratory Endpoints - Treatment titration plan as described by the treating clinician. - Treatment switch plan as described by the treating physician. - Treatment dose prescribed. - Real-world KarXT utilization metrics (e.g., adherence, persistence, and discontinuation rates). - Additional quality of life and secondary patient-reported outcomes.

8. Safety & Adverse Event Reporting

Adverse Event (AE) Monitoring: Routine real-world pharmacovigilance; spontaneous reporting by patients and physicians as per standard clinical practice for approved medications. **Serious Adverse Events (SAEs):** Reported to the sponsor and regulatory authorities according to post-marketing safety reporting regulations. **Data Monitoring Committee (DMC):** N/A (Observational registry).

9. Statistical Analysis Plan (SAP) Summary

Analysis Populations: All enrolled participants who met eligibility criteria and received at least one prescription order of xanomeline and trospium chloride (Real-world cohort). **Sample Size Justification:** Target sample size of $N=300$ aimed to provide descriptive robust statistical power for PRO measures across the schizophrenia adult cohort. **Handling of Missing Data:** Appropriate imputation methods for PROs (e.g., Multiple Imputation or standard mixed-model repeated measures) tailored for real-world evidence registries.

10. Quality Assurance & Regulatory Compliance

GCP Compliance: This study will be conducted in accordance with observational study guidelines, standard ethical guidelines, and informed consent will be approved by an IRB/IEC. **Monitoring Plan:** Data verification of electronic/paper PRO inputs and periodic site contact to ensure proper registry data collection. **Audit Trail:** Secure database for PRO collection via electronic devices, ensuring data privacy and compliance.

11. Study Identifiers & Governance

Primary ID: CN012-0066 **Registry Number:** NCT07101094 **Posting ID:** 898655007883087458 **Sponsor/Lead Organization:** Bristol Myers Squibb **Study Title:** Evaluation of Treatment Satisfaction and KarXT Utilization Registry (RESKU) **Official Regulatory Title:**

12. Clinical Framework (Schizophrenia Specific)

Disease Area: Schizophrenia **Preferred UMLS Name:** Drug Utilization
Semantic Type: Mental or Behavioral Dysfunction **Disease**
Definition: A major psychotic disorder characterized by abnormalities in the perception or expression of reality. It affects the cognitive and psychomotor functions. Common clinical signs and symptoms include delusions, hallucinations, disorganized thinking, and retreat from reality. **Diagnosis**
Threshold: Confirmed clinical diagnosis of schizophrenia prior to index date **Medical Methodology:** Routine clinical management initiating xanomeline and trospium chloride (XT) **Optimization**
Target: Improved patient treatment preference and satisfaction
Relevant Ontology Codes: - **MeSH Code:** D012559 - **HPO Code:** HP: 0100753 - **SNOMED ID:** 58214004

13. Study Procedures & Methodology

Management Pathway: Standard clinical pathway for patients initiating XT therapy **Education Protocol (HCP):** N/A (observational standard of care) **Education Protocol (Patient):** Instructions provided on how to complete the POM and MSQ questionnaires via an electronic device or paper **Quality Audit**
Mechanism: Tracking of electronic PRO compliance and questionnaire completion rates

14. Observation & Follow-Up Schedule

Total Duration: Primary observation span of 6 months (Month 1, 3, 6 assessments) **Onsite Visit Cadence:** Aligned with routine clinical care (Baseline, Month 1, Month 3, Month 6) **Remote**
Monitoring Frequency: Electronic PRO collection aligned with specific assessment months **Checklist Review Interval:** Data review at Months 1, 3, and 6
