

1. Administrative & Study Identification

Full Study Title: A Phase I, Randomized, Investigator/ Participant-Blind, Placebo-Controlled, Fixed-Sequence Study to Investigate the Safety, Tolerability, and Pharmacokinetics of Multiple Doses of Orally Administered R07795081 and the Effect of Steady-State Dose of Orally Administered R07795081 on the Pharmacokinetics of Pitavastatin and Rosuvastatin in Otherwise Healthy Overweight or Obese Adult Participants **Short Title/ Acronym:** A Study Investigating the Safety of R07795081 and the Effect of R07795081 on How the Body Processes Pitavastatin and Rosuvastatin in Otherwise Healthy Overweight or Obese Adult Participants **Protocol Number:** BP45800 **NCT Number:** NCT06982131 **Sponsor Name:** Roche **Investigational Product:** R07795081, Pitavastatin, Rosuvastatin, Placebo **Phase of Development:** Phase 1 **Trial Status:** RECRUITING **Medical Monitor:** Roche Clinical Operations Lead

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective: To investigate the safety, tolerability, and pharmacokinetics (PK) of multiple doses of orally administered R07795081 and the effect of a steady-state dose of R07795081 on the PK of pitavastatin and rosuvastatin in otherwise healthy overweight or obese adult participants. **Secondary Objectives:** To evaluate additional PK parameters and general safety biomarkers.

2.2 Background & Rationale To evaluate potential drug-drug interactions (DDI) and understand how the body processes commonly prescribed statins (pitavastatin and rosuvastatin) when co-administered with the investigational drug R07795081 in overweight or obese patients.

3. Study Design & Methodology

3.1 Design Framework

Study Type: Interventional **Control Type:** Placebo-controlled **Blinding:** Investigator/Participant-Blind (Double-blind) **Randomization:** Randomized, Fixed-sequence, Cross-over **Trial Status:** RECRUITING

3.2 Planned Enrollment & Duration

Target N\$: 40 Number of Sites: Global/Regional Phase 1 clinical pharmacology unit(s) **Estimated Study Start:** 04-Jun-2025 **Estimated Primary Completion:** 05-Jun-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria 1. Healthy participants with no clinically relevant findings on physical examination at screening and at baseline (including detailed medical and surgical history, vital signs, 12-lead ECG, hematology, blood chemistry, and urinalysis); with no suspicion of cognitive impairment or dementia as judged by the Investigator; who are not under judicial supervision, guardianship, or curatorship. 2. Body Mass Index (BMI) ≥ 27.0 kg/m² at screening and on Day -1 of Period 1. 3. Stable body weight (defined as $<5\%$ gain or loss) in the 2 months prior to screening as per verbal report by the participant and for the period between screening and Day -1 of Period 1 as per measured weight. 4. Agreement to adhere to the contraception requirements.

4.2 Exclusion Criteria 1. Pregnant, breastfeeding, or intending to become pregnant during the study. 2. Any condition or disease detected during the medical interview or physical examination that would render the participant unsuitable for the study, place the participant at undue risk, or interfere with the ability of the participant to complete the study in the opinion of the Investigator. 3. History or presence of any clinically significant cardiovascular, broncho-pulmonary, hepatic, renal, gastrointestinal, endocrinological, hematological, neurological, psychiatric, or metabolic disorders, allergic diseases, hypofertility, cancer, or cirrhosis. 4. History or evidence of any medical condition capable of significantly altering the absorption, metabolism, or elimination of drugs. 5. History of convulsions (other than benign febrile convulsions of childhood) including epilepsy, or personal history of significant cerebral trauma or CNS infections (e.g., meningitis). 6. History of acute or chronic metabolic acidosis, including diabetic ketoacidosis with or without coma.

5. Intervention & Treatment Plan

5.1 Investigational Regimen

Dosage/Frequency: Multiple oral doses of R07795081; specific single doses of pitavastatin (e.g., 1 mg on Day 1 of Period 2 and Period 5) and rosuvastatin. **Route of Administration:** Oral
Duration of Treatment: Multiple cross-over study periods.

5.2 Concomitant & Prohibited Therapy

Permitted: Standard meals and fluids as specified by the Phase 1 clinic protocol. **Prohibited:** Any non-study statins or medications that may interfere with the metabolism of the study drugs.

6. Study Timeline & Visit Schedule

| Visit ID | Window (Days) | Key Activities/Procedures | | :---
| :--- | :--- | | **Screening** | Day -28 to 0 | Informed Consent, Medical History, BMI check, Vital Signs, Labs | | **Baseline** | Day -1 | Admission to clinic, Baseline assessments, Weight Measurement | | **Interim** | Treatment Periods | Dosing of R07795081/Statins, PK Blood Draws, ECG, Safety Labs | | **End of Study** | Follow-up | Final Vital Signs, Exit Interview, IP Accountability |

7. Outcome Measures (Endpoints)

7.1 Primary Endpoint Definition: 1. Incidence and Severity of Adverse Events 2. Incidence of Abnormal Clinical Laboratory Test Results 3. Incidence of Abnormal Vital Sign Assessments

Measurement Method: Validated bioanalytical assays for plasma/serum concentrations; clinical physical exams.

7.2 Secondary & Exploratory Endpoints * [Endpoint 1] Plasma Concentration of R07795081 Over Time, Administered Alone and in Combination with Rosuvastatin and Pitavastatin * [Endpoint 2] Cmax of R07795081, Administered Alone and in Combination with Rosuvastatin and Pitavastatin * [Endpoint 3] Tmax of R07795081, Administered Alone and in Combination with Rosuvastatin and Pitavastatin

8. Safety & Adverse Event Reporting

Adverse Event (AE) Monitoring: Continuous monitoring during in-patient stays at the clinical unit, physical exams, and lab assessments. **Serious Adverse Events (SAEs):** Reported within standard 24-hour timelines. **Data Monitoring Committee (DMC):** Internal Phase 1 safety review committee.

9. Statistical Analysis Plan (SAP) Summary

Analysis Populations: Safety Analysis Set, Pharmacokinetic (PK) Analysis Set. **Sample Size Justification:** Target \$N = 40\$ participants, powered to provide adequate precision for PK parameters and evaluate DDI effects in a crossover design. **Handling of Missing Data:** Standard non-compartmental PK analysis without imputation for missing concentration values.

10. Quality Assurance & Regulatory Compliance

GCP Compliance: This study will be conducted in accordance with Good Clinical Practice (GCP) and the Declaration of Helsinki.

Monitoring Plan: Continuous onsite monitoring characteristic of an inpatient Phase 1 clinical unit. **Audit Trail:** eCRF locking, source data verification, and secure PK sample tracking.

11. Study Identifiers & Governance

Primary ID: BP45800 **Registry Number:** NCT06982131 **Sponsor/Lead Organization:** Roche **Study Title:** A Study Investigating the Safety of R07795081 and the Effect of R07795081 on How the Body Processes Pitavastatin and Rosuvastatin in Otherwise Healthy Overweight or Obese Adult Participants **Official Regulatory Title:** A Phase I, Randomized, Investigator/Participant-Blind, Placebo-Controlled, Fixed-Sequence Study to Investigate the Safety, Tolerability, and Pharmacokinetics of Multiple Doses of Orally Administered R07795081 and the Effect of Steady-State Dose of Orally Administered R07795081 on the Pharmacokinetics of Pitavastatin and Rosuvastatin in Otherwise Healthy Overweight or Obese Adult Participants

12. Clinical Framework (Study Specific)

Primary Condition: Overweight, Obesity **Diagnosis Threshold:** BMI ≥ 27.0 kg/m² **Medical Methodology:** Pharmacokinetic Drug Interaction & PK Assessment **Optimization Target:** Steady-state PK evaluation of co-administered statins

13. Study Procedures & Methodology

Management Pathway: Phase 1 clinical pharmacology unit standard pathway **Education Protocol (HCP):** Protocol-specific PK sampling and exact dosing schedule training **Education Protocol (Patient):** Informed consent, inpatient clinic rules, and fasting/dietary restrictions **Quality Audit Mechanism:** Source data verification, clinical trial unit audits, and PK sample chain-of-custody tracking

14. Observation & Follow-Up Schedule

Total Duration: Approximately 8-12 weeks including screening, treatment periods, and follow-up **Onsite Visit Cadence:** Continuous stay required during sequential Treatment Periods (e.g., Periods 1, 2, 5) **Remote Monitoring Frequency:** N/A (Phase 1 inpatient study) **Checklist Review Interval:** Daily during clinic admission
