

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

## 1. Administrative & Study Identification

|                          |                                                                                                                                                 |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| Full Study Title:        | A Prospective, Single-arm, Open-label, Non-interventional, Multicenter to Assess the Safety of BNT162b2 in Domestic Post-marketing Surveillance |
| Short Title:             | Korea Comirnaty Post-marketing Surveillance                                                                                                     |
| Protocol Number:         | 226251633705118252                                                                                                                              |
| NCT Number:              | NCT05032976                                                                                                                                     |
| Sponsor Name:            | Pfizer                                                                                                                                          |
| Investigational Product: | raxtozinameran                                                                                                                                  |
| Phase:                   | Not Applicable                                                                                                                                  |
| Medical Monitor:         | [Not Provided in Posting]                                                                                                                       |

## 2. Study Synopsis & Rationale

### 2.1 Study Objective

|                    |                                                                                                                                                                                                                                                                                                                                                                                         |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Primary Objective: | 1. Number of subjects with Solicited adverse events: Solicited adverse events within 1 week (Day 1-7) after each dose of BNT162b2 products, and a number of subjects with such events will be collected. 2. Number of subjects with Unsolicited adverse events: Unsolicited adverse events within 28 days by its last dose, and a number of subjects with such events will be collected |
| Secondary Obj.:    | 1. Number of subjects with Adverse Events (AEs) 2. Number of subjects with Serious Adverse Events 3. Number of subjects with Expected Adverse Events                                                                                                                                                                                                                                    |

### 2.2 Background & Rationale

This study will collect information on the safety of BNT162b2 products for subjects who have been administered in a routine clinical practice from 05Mar2021 to 04Mar2027 in Korea, and will be conducted in accordance with the New Drug Re-Examination Guideline of the Ministry of Food and Drug Safety (MFDS).

## 3. Study Design & Methodology

|                   |                                                    |
|-------------------|----------------------------------------------------|
| Design Framework: | Type: OBSERVATIONAL, Status: ACTIVE_NOT_RECRUITING |
| Target N:         | 12000                                              |

## 4. Subject Selection (Eligibility Criteria)

### 4.1 Inclusion Criteria

Not Provided

### 4.2 Exclusion Criteria

Not Provided

## 11. Study Identifiers & Governance

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

**Primary ID:** 226251633705118252  
**Registry Number:** NCT05032976  
**Sponsor:** Pfizer  
**Study Title:** Korea Comirnaty Post-marketing Surveillance
