

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	An Observational Study to Evaluate the Safety and Effectiveness of Trastuzumab Emtansine (T-DM1) as Second- or Later-Line Therapy in Chinese Patients With HER2 Positive Advanced Breast Cancer
Short Title:	A Study to Evaluate the Safety and Effectiveness of Trastuzumab Emtansine (T-DM1) as Therapy in Chinese Participants With HER2 Positive Advanced Breast Cancer
Protocol Number:	254787010413275641
NCT Number:	NCT05945927
Sponsor Name:	Roche
Investigational Product:	trastuzumab emtansine
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Percentage of Participants with Adverse Events
Secondary Obj.:	1. Real-world Progression Free Survival (rwPFS) 2. Time-to-treatment Discontinuation (TTD) 3. Percentage of Participants Exposed to T-DM1 by Line of Therapy

2.2 Background & Rationale

This study is a post-marketing, observational, multicenter, prospective study. It will investigate the the safety and effectiveness of T-DM1 in the Chinese population in real-world clinical practice.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: COMPLETED
Target N:	178

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Diagnosed with HER2-positive, unresectable locally advanced or metastatic breast cancer before the start of T-DM1 treatment
- * Had prior treatment for breast cancer which must contain a taxane and trastuzumab
- * Get the treatment of T-DM1 for the first time after diagnosis of breast cancer

4.2 Exclusion Criteria

- * Patients not receiving treatment for HER2-positive breast cancer with T-DM1 according to standard of care and in line with the current summary of product characteristics (SPC)/local labeling
- * Has been previously treated with T-DM1 before current clinical visit

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

* Currently participating in any clinical trials

* Previously participated in any clinical trials investigating anti-HER2 drug within 1 year of the initiation of T-DM1

11. Study Identifiers & Governance

Primary ID: 254787010413275641

Registry Number: NCT05945927

Sponsor: Roche

Study Title: A Study to Evaluate the Safety and Effectiveness of Trastuzumab Emtansine (T-DM1) as Therapy in Chinese Participants With HER2 Positive Advanced Breast Cancer

15. Sign-off & Approval
