

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Protocol for Transgene Assay Service
Short Title:	Transgene Assay Testing Service of Tumor Samples From Patients Who Received a Bristol-Myers Squibb Manufactured Gene Modified Cell Therapy and Have a Qualifying Second Primary Malignancy
Protocol Number:	347256208781171904
NCT Number:	NCT06357754
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	idecabtagene vicleucel
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Participant in situ hybridization (ISH) or droplet-based digital Polymerase chain reaction (ddPCR) transgene testing results 2. Participant insertion site analysis (ISA) testing results: For participants with positive in situ hybridization (ISH) transgene or droplet-based digital polymerase chain reaction (ddPCR) transgene
Secondary Obj.:	Not Provided

2.2 Background & Rationale

The purpose of this transgene assay testing service is to evaluate tumor samples for transgene levels in patients who received a commercially available Bristol-Myers Squibb manufactured gene modified cellular therapy and have reported a qualifying second malignancy.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: RECRUITING
Target N:	50

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Participant has received a commercially available Bristol-Myers Squibb (BMS) manufactured Gene Modified Cell Therapy (GMCT) and has been diagnosed with a qualifying second primary malignancy or a second primary malignancy which BMS has qualified for testing.
- * Participant has received a commercially available BMS manufactured GMCT in a clinical trial or other investigational setting (including non-conforming product) for which there is no testing protocol in place for that trial or investigational setting and has been diagnosed with a qualifying second primary malignancy or a second primary malignancy which

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

BMS has qualified for testing.

4.2 Exclusion Criteria

- * Participant is actively participating in a clinical trial where information and sample collection is being conducted under that clinical trial.
- * Participant has not received a BMS manufactured GMCT or has not been diagnosed with a qualifying second primary malignancy.

11. Study Identifiers & Governance

Primary ID:	347256208781171904
Registry Number:	NCT06357754
Sponsor:	Bristol Myers Squibb
Study Title:	Transgene Assay Testing Service of Tumor Samples From Patients Who Received a Bristol-Myers Squibb Manufactured Gene Modified Cell Therapy and Have a Qualifying Second Primary Malignancy
