

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Deliver Insights in Hypertrophic Cardiomyopathy and Observational Outcomes in Real World: United States and European Prospective Registry Study
Short Title:	A Prospective Registry Study to Assess Real-world Patient Characteristics, Treatment Patterns, and Longitudinal Outcomes in Patients Receiving Mavacamten and Other Treatments for Symptomatic Obstructive Hypertrophic Cardiomyopathy (Obstructive-HCM)
Protocol Number:	400088017116238223
NCT Number:	NCT05489705
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	mavacamten
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Incidence rate of new or worsening heart failure due to systolic dysfunction among participants with symptomatic obstructive HCM during periods of exposure to mavacamten and other oHCM treatment: Systolic dysfunction defined as symptomatic Left Ventricular Ejection Fraction (LVEF) $\leq$ 50%. United States participants only. 2. Change in resting left ventricular outflow tract (LVOT) gradient from baseline: European Participants only
Secondary Obj.:	1. Occurrence of arrhythmia 2. New or worsening heart failure due to systolic dysfunction 3. Proportion of participants with a resting or provoked peak left ventricular outflow tract (LVOT) gradient below 50 mmHG

2.2 Background & Rationale

This registry evaluates patient characteristics, real-world treatment patterns, and short- and long-term outcomes in a population of patients in the United States and Europe with symptomatic obstructive hypertrophic cardiomyopathy (HCM) who are receiving mavacamten, receiving other treatment for obstructive HCM, or not receiving treatment for obstructive HCM due to intolerance or failure of prior treatment.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: RECRUITING
Target N:	1600

4. Subject Selection (Eligibility Criteria)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.1 Inclusion Criteria

Not Provided

4.2 Exclusion Criteria

Not Provided

11. Study Identifiers & Governance

Primary ID:	400088017116238223
Registry Number:	NCT05489705
Sponsor:	Bristol Myers Squibb
Study Title:	A Prospective Registry Study to Assess Real-world Patient Characteristics, Treatment Patterns, and Longitudinal Outcomes in Patients Receiving Mavacamten and Other Treatments for Symptomatic Obstructive Hypertrophic Cardiomyopathy (Obstructive-HCM)

15. Sign-off & Approval
