Document Status: Final | Version: 1.0 | Date: 01-APR-2026

## 1. Administrative & Study Identification

|                          |                                                                                                                                                                                                                                                                                                       |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Full Study Title:        | A Modular Phase I, Open-Label, Multicentre Study to Assess the Safety, Tolerability, Pharmacokinetics and Preliminary Anti-tumour Activity of Ceralasertib in Combination With Cytotoxic Chemotherapy and/or DNA Damage Repair/Novel Anti-cancer Agents in Patients With Advanced Solid Malignancies. |
| Short Title:             | Ascending Doses of Ceralasertib in Combination With Chemotherapy and/or Novel Anti Cancer Agents                                                                                                                                                                                                      |
| Protocol Number:         | 415539917422220602                                                                                                                                                                                                                                                                                    |
| NCT Number:              | NCT02264678                                                                                                                                                                                                                                                                                           |
| Sponsor Name:            | AstraZeneca                                                                                                                                                                                                                                                                                           |
| Investigational Product: | carboplatin                                                                                                                                                                                                                                                                                           |
| Phase:                   | PHASE1, PHASE2                                                                                                                                                                                                                                                                                        |
| Medical Monitor:         | [Not Provided in Posting]                                                                                                                                                                                                                                                                             |

## 2. Study Synopsis & Rationale

### 2.1 Study Objective

|                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Primary Objective: | <p>1. The number of subjects with adverse events/serious adverse events: Number of patients with adverse events and with serious adverse events including abnormal clinical observations, DLT, abnormal Electrocardiogram (ECG) parameters, abnormal laboratory assessments and abnormal vital signs that changed from baseline. 2. Module 4 only: Effect of food on ceralasertib absorption by Intensive PK assessments after a single oral dose of ceralasertib (Part A): Intensive PK sampling at defined timepoints to measure Geometric mean and 90% CI for the ratio of fed:</p> <p>fasted in area under the plasma concentration time curve from zero to the last measurable time point (AUC<sub>0-t</sub>), area under the plasma concentration time curve from zero to infinity (AUC) 3. Module 4 only: Effect of ceralasertib on ECG parameters (HR, PR, QRS and QTcF) by ECG recordings: Change from baseline HR, PR, QRS and QTcF (?HR, ?PR, ?QRS and ?QTcF) Categorical outliers for QTcF, HR, PR, and QRS Frequency of treatment emergent T and U wave abnormalities If a substantial HR effect is observed (i.e., the absolute value of the largest least squares [LS] mean ?HR is greater than 10bpm in the by-time point analysis), other correction methods such as individualised and optimised individualised HR corrected QT interval (QTcI) will be explored and compared.</p> <p>The method that removes the HR dependence of the QT interval most efficiently will be chosen as the primary correction method.</p> |
| Secondary Obj.:    | <p>1. Maximum Observed Plasma Concentration (C<sub>max</sub>) of ceralasertib 2. Time to</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

observed Cmax (Tmax) for ceralasertib 3. Area under the plasma concentration-time curve (AUC) for ceralasertib

## 2.2 Background & Rationale

This is a modular, phase I/ phase 1 b, open-label, multicentre study of ceralasertib administered orally in combination with cytotoxic chemotherapy regimens and/or novel anti-cancer agents, to patients with advanced malignancies. The study design allows an investigation of optimal combination dose of ceralasertib with other anti-cancer treatments, with intensive safety monitoring to ensure the safety of the patients. The initial combination to be investigated is ceralasertib with carboplatin. The second combination to be investigated is ceralasertib with Olaparib. The third combination to be investigated is ceralasertib with durvalumab. The fourth module will investigate the effect of food on ceralasertib absorption and the effect of ceralasertib on ECG parameter. The fifth module to be investigated is ceralasertib with AZD5305.

## 3. Study Design & Methodology

**Design Framework:** Type: INTERVENTIONAL, Phase: PHASE1, PHASE2, Status: ACTIVE\_NOT\_RECRUITING

**Target N:** 357

## 4. Subject Selection (Eligibility Criteria)

### 4.1 Inclusion Criteria

Not Provided

### 4.2 Exclusion Criteria

Not Provided

## 11. Study Identifiers & Governance

**Primary ID:** 415539917422220602

**Registry Number:** NCT02264678

**Sponsor:** AstraZeneca

**Study Title:** Ascending Doses of Ceralasertib in Combination With Chemotherapy and/or Novel Anti Cancer Agents
