

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Evaluation of the Clinical Benefit of ToFAcitinib Treatment in Patients With Moderate to Severe Ulcerative Colitis Under Real-life Conditions of Use: TOFAst Study
Short Title:	Tofacitinib in Adult Patients With Moderate to Severe Ulcerative Colitis
Protocol Number:	666633849431694640
NCT Number:	NCT04424303
Sponsor Name:	Pfizer
Investigational Product:	tofacitinib
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective: 1. Proportion of patients with clinical benefit one year after initiation of tofacitinib treatment.: The definition of clinical benefit is independent of the discontinuation or not of tofacitinib treatment during the observation period.

Clinical benefit at year is defined on the basis of symptomatic remission evaluated with the PRO2 score ?1 (absence of rectal bleeding and a stool frequency score between 0 and 1)*. Patients who died or who had a colectomy or used another biologic/anti-JAK/immunosuppressant will be considered to be non-responders, as well as patients who used oal corticosteroids for UC, (regardless of the treatment duration) during the 3 months preceding the end of the observation period.

The clinical benefit of tofacitinib is independent of the administration or not of 5-ASA, or corticosteroids (not complying with the above definition) during the observation period (between 0 and 1 year).

Secondary Obj.: 1. Proportion of patients with clinical benefit of tofacitinib at 2 years 2. Predictors of the clinical benefit at one year identified from the available baseline data 3. Proportion of patients in clinical remission and still receiving tofacitinib

2.2 Background & Rationale

This is an observational prospective study with two years of follow-up, designed to evaluate the effectiveness of tofacitinib in patients with moderate to severe ulcerative colitis in French clinical practice

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: RECRUITING
Target N:	280

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Patients of 18 years old or above
- * Patients with confirmed diagnosis of moderate to severe ulcerative colitis
- * Patients for whom gastroenterologist decides to initiate treatment with tofacitinib as per the French SmPC
- * Patients informed about the study procedures and receiving an information letter signed by the investigator

4.2 Exclusion Criteria

- * Patients who have already received tofacitinib treatment before baseline
- * Patients that fulfill any of the contraindications according to the latest version of the SmPC

11. Study Identifiers & Governance

Primary ID: 666633849431694640
Registry Number: NCT04424303
Sponsor: Pfizer
Study Title: Tofacitinib in Adult Patients With Moderate to Severe Ulcerative Colitis

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
Clinical Operations Lead: _____ Date: _____
Lead Statistician: _____ Date: _____
