

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Real-World, Long-Term Data Collection to Gain Clinical Insights Into Roche Ophthalmology Products (VOYAGER STUDY)
Short Title:	A Real-World Study to Gain Clinical Insights Into Roche Ophthalmology Products
Protocol Number:	720847245422991155
NCT Number:	NCT05476926
Sponsor Name:	Roche
Investigational Product:	faricimab
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Change in Visual Acuity from Baseline at 1 Year, per Approved Retinal Indication and Product: Visual acuity will be collected as measured per local practice and then will be converted to the approximate ETDRS letter score.
Secondary Obj.:	1. Change in Visual Acuity from Baseline Over Time, per Approved Retinal Indication and Product 2. Percentage of Eyes on Each Treatment Regimen (Fixed, Treat-and-Extend, As Needed, or Other) Over Time, per Approved Retinal Indication and Product 3. Number of Treatments Over Time, per Approved Retinal Indication and Product

2.2 Background & Rationale

The VOYAGER study is a primary data collection, non-interventional, prospective, multinational, multicenter study. It is designed to collect real-world, long-term data to explore long-term effectiveness, safety, clinical insights, treatment patterns, and factors driving the treatment decisions among patients being treated with specified Roche ophthalmology products in approved retinal indications (Faricimab for neovascular age-related macular degeneration \[nAMD\], diabetic macular edema \[DME\], and retinal vein occlusion; Port Delivery System with Ranibizumab for nAMD) in routine clinical practice. This study will not provide or make recommendations on use of any products including Roche products; treatment decisions will be determined by the treating physician and must be made independently to the decision to participate in this study. Participation in this study will not change or influence a patient's standard of care in any way.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: RECRUITING
Target N:	6000

4. Subject Selection (Eligibility Criteria)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.1 Inclusion Criteria

1\ Have provided informed consent, as required per local regulations 2.a) Adult patient, as defined by local regulations and local product label, who is newly initiating treatment (or initiated treatment in the previous visit) with a specified approved Roche ophthalmology product in retinal indication of interest for this study in at least one eye, according to the investigator's discretion in routine clinical practice; OR 2.b) Adult patient, as defined by local regulations and local product label, who is continuing treatment with any specified approved Roche ophthalmology product in retinal indication of interest for this study in at least one eye after initiating that treatment in a Roche interventional trial.

4.2 Exclusion Criteria

1\ Concomitant participation of the patient in an investigational ophthalmology clinical trial that includes receipt of any investigational drug or procedure within the last 28 days prior to enrollment (this restriction does not apply to patients who are rolling over from Roche interventional studies and continuing treatment with any specified approved Roche ophthalmology product in retinal indication of interest for this study)

11. Study Identifiers & Governance

Primary ID: 720847245422991155

Registry Number: NCT05476926

Sponsor: Roche

Study Title: A Real-World Study to Gain Clinical Insights Into Roche Ophthalmology Products

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____

Lead Statistician: _____ Date: _____
