

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 1, Open-Label, Dose-Finding Study of BMS-986453, Dual Targeting BCMAxGPRC5D Chimeric Antigen Receptor T Cells, in Participants With Relapsed and/or Refractory Multiple Myeloma
Short Title:	A Study to Assess BMS-986453 in Participants With Relapsed and/or Refractory Multiple Myeloma
Protocol Number:	8265227443882228
NCT Number:	NCT06153251
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	cyclophosphamide
Phase:	PHASE1
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of participants with treatment-emergent adverse events (AEs) 2. Number of participants with serious adverse events (SAEs) 3. Number of participants with AEs leading to discontinuation
Secondary Obj.:	1. Maximum observed concentration (Cmax) 2. Time of maximum observed concentration (Tmax) 3. Area under the blood concentration-time curve from time zero to 28 days after dosing (AUC(0-28D))

2.2 Background & Rationale

The purpose of this study is to assess BMS-986453 in participants with relapsed and/or refractory multiple myeloma (RRMM).

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE1, Status: RECRUITING
Target N:	150

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Participants must have a diagnosis of multiple myeloma with relapsed and/or refractory disease.
- * Participants must have confirmed progressive disease on or within 12 months (measured from the last dose) of completing treatment with the last anti-myeloma treatment regimen before study entry.
- * Participants in Part A and Part B Cohort 1 and in Part B Cohort 2 must have relapsed/refractory multiple myeloma and received previous antimyeloma therapy, including a proteasome inhibitor and an immunomodulatory agent.

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * Participants must have an Eastern Cooperative Oncology Group (ECOG) performance status of 0 or 1.
- * Participants must have adequate organ function.

4.2 Exclusion Criteria

- * Participants must not have any known active or history of central nervous system (CNS) involvement of multiple myeloma.
- * Participants must not have active or history of plasma cell leukemia, Waldenstrom's macroglobulinemia, POEMS (polyneuropathy, organomegaly, endocrinopathy, monoclonal protein, skin changes) syndrome, or clinically significant amyloidosis.
- * Participants must not have a history or presence of clinically significant CNS pathology such as seizure disorder, aphasia, stroke, severe brain injury, dementia, Parkinson's disease, or cerebellar disease, or presence of clinically active psychosis.

Other protocol-defined inclusion/exclusion criteria apply

11. Study Identifiers & Governance

Primary ID: 8265227443882228

Registry Number: NCT06153251

Sponsor: Bristol Myers Squibb

Study Title: A Study to Assess BMS-986453 in Participants With Relapsed and/or Refractory Multiple Myeloma

15. Sign-off & Approval
