

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Not Provided
Short Title:	Mavacamten Pregnancy Surveillance Program
Protocol Number:	896312571431791347
NCT Number:	NCT05939700
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	mavacamten
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Pregnancy outcomes: (1) Number of live births, full term or preterm births, stillbirths, spontaneous abortions, and elective abortions, (2) Number of participants with pregnancy complications 2. Fetal/neonatal/infant outcomes: Number of fetal/neonatal/infants in utero, at birth, and through the first year of life with major and minor congenital malformations, small for gestational age, premature delivery, and post-natal growth and development deficiency
Secondary Obj.:	Not Provided

2.2 Background & Rationale

The purpose of this observational pregnancy safety study is to assess maternal, fetal, and infant outcomes after exposure to mavacamten at any time during pregnancy and/or breastfeeding.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: RECRUITING
Target N:	20

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Exposure to at least 1 dose of mavacamten at any time during pregnancy (from 4 months prior to conception to pregnancy outcome) and/or at any time during breastfeeding (up to 12 months of infant age or weaning, whichever comes first)
- * At least 15 years of age or older at the time of enrollment
- * Informed consent or institutional review board/ethics committee-approved waiver of informed consent

4.2 Exclusion Criteria

\- None
