

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Ambispective Observational Study of Muscle Invasive Urothelial Carcinoma Patients Treated With Adjuvant Nivolumab in France
Short Title:	Observational Study of Muscle Invasive Urothelial Carcinoma Participants Treated With Adjuvant Nivolumab in France
Protocol Number:	926594301606011634
NCT Number:	NCT06421311
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	nivolumab
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Disease-free survival (DFS) of participants
Secondary Obj.:	1. Time to recurrence (TRR) 2. Distance metastases-free survival (DMFS) 3. Non-urothelial tract recurrence free survival (NUTRFS)

2.2 Background & Rationale

This study will estimate the real-world effectiveness of adjuvant nivolumab therapy in adult participants with muscle invasive urothelial carcinoma (MIUC) in France.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: TERMINATED
Target N:	176

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Participants with pathological evidence of muscle invasive urothelial carcinoma (originating in bladder, ureter, or renal pelvis) at high risk of recurrence after radical resection with programmed death-ligand 1 (PD-L1) tumour cell expression $\geq 1\%$:
 - * Who received neoadjuvant chemotherapy OR
 - * Who did not receive neoadjuvant chemotherapy and who are not eligible or refusing adjuvant cisplatin chemotherapy
- * At least 18 years of age at the time of treatment decision
- * Decision to treat with adjuvant nivolumab therapy has already been taken
- * Participants who provide oral informed consent to participate in the study (or who express non-opposition to data

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

collection during their lifetime for deceased patients enrolled retrospectively)

4.2 Exclusion Criteria

- * Participants with a current primary diagnosis of a cancer other than muscle invasive urothelial carcinoma within the past 5 years, ie, a cancer other than urothelial carcinoma that requires systemic or other treatment or has not been treated curatively (as per discretion of the investigator)
- * Participants currently enrolled in an interventional clinical trial for their urothelial carcinoma. Patients who have completed their participation in an interventional trial or who are not receiving study drug anymore and who are only followed-up for overall survival (OS) can be enrolled. Patients enrolled in a clinical trial not evaluating an investigational drug can be enrolled (e.g. trial investigating novel imaging modalities).
- * Pregnant women
- * Participants under guardianship

11. Study Identifiers & Governance

Primary ID:	926594301606011634
Registry Number:	NCT06421311
Sponsor:	Bristol Myers Squibb
Study Title:	Observational Study of Muscle Invasive Urothelial Carcinoma Participants Treated With Adjuvant Nivolumab in France
