

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Continuing Treatment for Participants Who Have Participated in a Prior Protocol Investigating CC-122
Short Title:	A Rollover Study of CC-122
Protocol Number:	988453731642327736
NCT Number:	NCT05688475
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	dexamethasone
Phase:	PHASE1
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of participants with serious adverse events (SAEs) for participants who received at least 1 dose of CC-122 2. Number of deaths for participants who received at least 1 dose of CC-122
Secondary Obj.:	Not Provided

2.2 Background & Rationale

The purpose of the study is to provide CC-122 treatment to participants who have been receiving treatment in other CC-122 clinical trials investigating CC-122 for more than 5 years (CC-122-ST-001 \[NCT01421524\], CC-122-ST-002 \[NCT02509039\], CC-122-DBCL-001 \[NCT02031419\], and CC-122-NHL-001 \[NCT02417285\]), receiving clinical benefit from the treatment and to monitor the safety and tolerability of CC-122.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE1, Status: ACTIVE_NOT_RECRUITING
Target N:	12

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Participant who is currently receiving CC-122 on another CC-122 clinical trial that has met its primary and secondary endpoints.
- * Participant who has participated in previous CC-122 protocol (including CC-122-ST-001 \[NCT01421524\], CC-122-ST-002 \[NCT02509039\], CC-122-DBCL-001 \[NCT02031419\], and CC-122-NHL-001 \[NCT02417285\]), and is deemed by the investigator to be deriving benefit from CC-122 as defined by the previous protocol.
- * Participant who is able to tolerate study therapy and has not yet experienced progressive disease or any treatment discontinuation criteria of the Parent Study.

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

Key Exclusion Criteria:

- * Participant is not eligible for CC-122 treatment as per the Parent Study.
- * Participants not receiving clinical benefit as assessed by the investigator. Any clinical AE, laboratory abnormality, or intercurrent illness which, in the opinion of the investigator, indicates that participation in the study is not in the best interest of the participant.
- * Women who are breastfeeding.

Note: Other protocol-defined inclusion/exclusion criteria apply.

4.2 Exclusion Criteria

- * Participant is not eligible for CC-122 treatment as per the Parent Study.
- * Participants not receiving clinical benefit as assessed by the investigator. Any clinical AE, laboratory abnormality, or intercurrent illness which, in the opinion of the investigator, indicates that participation in the study is not in the best interest of the participant.
- * Women who are breastfeeding.

Note: Other protocol-defined inclusion/exclusion criteria apply.

11. Study Identifiers & Governance

Primary ID: 988453731642327736
Registry Number: NCT05688475
Sponsor: Bristol Myers Squibb
Study Title: A Rollover Study of CC-122

15. Sign-off & Approval
