

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	An Open Label, Multi-center Roll-over Study to Assess Long-term Effect in Pediatric Patients Treated With Tafinlar (Dabrafenib) and/or Mekinist (Trametinib)
Short Title:	Pediatric Long-Term Follow-up and Rollover Study
Protocol Number:	469225023552225056
NCT Number:	NCT03975829
Sponsor Name:	Novartis
Investigational Product:	trametinib
Phase:	PHASE4
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of participants with Adverse Events and Serious Adverse Events (SAEs): To assess the long-term safety of treatment with dabrafenib, trametinib or the combination.
Secondary Obj.:	1. Percentage of participants with height (measured by cm or in) changes over time 2. Percentage of participants with weight (measured by kg or lb) changes over time 3. Percentage of participants with skeletal maturation (measured by bone age on x-ray or MRI) changes over time

2.2 Background & Rationale

A roll-over study to assess long-term effect in pediatric patients treated with dabrafenib and/or trametinib.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE4, Status: ACTIVE_NOT_RECRUITING
Target N:	163

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

All Subjects:

- * Written informed consent, according to local guidelines, signed by the subjects and/or by the parents or legal guardian prior to any study related screening procedures are performed.
- * Participation in a Novartis sponsored study such as CTMT212X2101, CDRB436G2201, CDRB436A2102, regardless of current age.
- * Parent study (or cohort of parent study) is planned to be closed.
- * Subject has demonstrated compliance, as assessed by the investigator, within the parent study protocol

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

requirement(s).

- * Willingness and ability to comply with scheduled visits, treatment plans and any other study procedures.

For Subjects Entering the Treatment Period:

- * Subject is currently receiving treatment with dabrafenib/trametinib monotherapy or combination within a Novartis Sponsored Drug Development study. Note that subjects who were on the chemotherapy arm of the CDRB436G2201 study are eligible for treatment period of this study only after crossing over into the experimental treatment arm of the CDRB436G2201 study

- * In the opinion of the investigator is likely to benefit from continued treatment.

Key Exclusion Criteria:

All Subjects:

- ↳ Subject has participated in a combination trial where dabrafenib and/or trametinib was dispensed in combination with another study medication.

For Subjects Entering the Treatment Period:

- * Subject has permanently discontinued from study treatment in the parent protocol due to any reason.

- * Treatment with dabrafenib and/or trametinib for the subject's indication is approved for marketing and the appropriate dosage form is commercially available and reimbursed in the local country

- * Subject currently has unresolved drug related severe toxicities for which dabrafenib and/or trametinib dosing has been interrupted in the parent study. If the subject should meet criteria to resume treatment on the parent protocol then they may be eligible for treatment in this study.

Other protocol-defined inclusion/exclusion may apply.

4.2 Exclusion Criteria

All Subjects:

- ↳ Subject has participated in a combination trial where dabrafenib and/or trametinib was dispensed in combination with another study medication.

For Subjects Entering the Treatment Period:

- * Subject has permanently discontinued from study treatment in the parent protocol due to any reason.

- * Treatment with dabrafenib and/or trametinib for the subject's indication is approved for marketing and the appropriate dosage form is commercially available and reimbursed in the local country

- * Subject currently has unresolved drug related severe toxicities for which dabrafenib and/or trametinib dosing has been

interrupted in the parent study. If the subject should meet criteria to resume treatment on the parent protocol then they may be eligible for treatment in this study.

Other protocol-defined inclusion/exclusion may apply.

11. Study Identifiers & Governance

Primary ID: 469225023552225056
Registry Number: NCT03975829
Sponsor: Novartis
Study Title: Pediatric Long-Term Follow-up and Rollover Study

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
Clinical Operations Lead: _____ Date: _____
Lead Statistician: _____ Date: _____
