

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	AN INTERVENTIONAL EFFICACY AND SAFETY, PHASE 3, DOUBLE-BLIND, PARALLEL GROUP STUDY TO INVESTIGATE INTERMITTENT PREVENTION OF MENSTRUAL MIGRAINE WITH RIMEGEPANT COMPARED WITH PLACEBO IN WOMEN PARTICIPANTS 18 TO 45 YEARS OF AGE
Short Title:	A Study to Learn About the Study Medicine Called Rimegepant in Women When Used for Intermittent Prevention of Menstrual Migraine
Protocol Number:	271503695776790138
NCT Number:	NCT06641466
Sponsor Name:	Pfizer
Investigational Product:	rimegepant
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Mean change from the Observation Period in number of migraine days per 5-day perimenstrual period across each cycle of the Double-Blind Treatment Phase: Change from Observation Period in the number of migraine days per the 5-day perimenstrual period
Secondary Obj.:	1. Mean change from the Observation Period in number of headache days per 5-day perimenstrual period across each cycle of the Double-Blind Treatment Phase 2. Percentage of participants with ≥50% reduction from the Observation Period in number of migraine days per 5-day perimenstrual period across each cycle of the Double-Blind Treatment Phase (50% responder) 3. Mean change from the Observation Period in number of acute migraine medication days per 5-day perimenstrual period across each cycle of the Double-Blind Treatment Phase

2.2 Background & Rationale

The purpose of this study is to evaluate the efficacy and safety of rimegepant when administered during the peri-menstrual period (PMP) for intermittent prevention of migraine in women who experience menstrual migraine attacks.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: RECRUITING
Target N:	723

4. Subject Selection (Eligibility Criteria)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.1 Inclusion Criteria

1. Participant has regular menstrual cycles ≥ 24 days and ≤ 34 days
2. A minimum 1-year history of migraine (with or without aura) consistent with a diagnosis according to the International Classification of Headache Disorders, 3rd Edition
3. A history of menstrual migraine attacks of at least 3 months
4. Participant reported history of experiencing at least 1 migraine attack during the perimenstrual period in at least 2 out of 3 menstrual cycles immediately prior to screening.
5. If the participant is receiving a permitted background continuous prophylactic migraine medication, the medication dose must be stable for at least 3 months prior to the Screening visit and, the dose is not expected to change during the course of the study

4.2 Exclusion Criteria

1. Greater than 6 migraine days per month that are outside of the perimenstrual period in the 3 months prior to Screening
2. A diagnosis of chronic migraine or a history of more than 14 headache days per month on average, in the 3 months prior to Screening
3. History of retinal migraine, basilar migraine or hemiplegic migraine
4. Current diagnosis of schizophrenia, bipolar, or borderline personality disorder
5. Other pain syndromes (eg, fibromyalgia, complex regional pain syndrome), or significant neurological disorders (other than migraine), or other medical conditions (including endocrine and gynecological eg, severe dysmenorrhea)

11. Study Identifiers & Governance

Primary ID:	271503695776790138
Registry Number:	NCT06641466
Sponsor:	Pfizer
Study Title:	A Study to Learn About the Study Medicine Called Rimegepant in Women When Used for Intermittent Prevention of Menstrual Migraine
