

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Randomized, Double-blind, Placebo-controlled, Multicenter Study to Evaluate the Efficacy, Safety, and Tolerability of Pelacarsen (TQJ230) With Background Inclisiran in Participants With Atherosclerotic Cardiovascular Disease (ASCVD), and Elevated LDL-C and Lp(a)
Short Title:	Lp(a) Lowering Study of Pelacarsen (TQJ230) With Background Inclisiran in Participants With Elevated Lp(a) and Established ASCVD
Protocol Number:	409288059304424177
NCT Number:	NCT06813911
Sponsor Name:	Novartis
Investigational Product:	inclisiran
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Change in log transformed lipoprotein A (Lp(a)) concentration: To evaluate the efficacy of Pelacarsen compared to placebo, in reducing Lp(a) levels at Month 6 in ASCVD participants who have elevated Lp(a), and who are on background inclisiran for elevated LDL-C
Secondary Obj.:	1. Proportion of participants achieving reduction in Lp(a) levels at Month 6 2. Incidence of treatment emergent adverse events (TEAEs) and treatment emergent serious adverse events (TESAEs) 3. Incidence of treatment emergent adverse events of special interest (AESI)

2.2 Background & Rationale

The purpose of the study CTQJ230A12304, is to evaluate the efficacy, safety, and tolerability of pelacarsen (TQJ230) compared to placebo in participants with ASCVD who have elevated lipoprotein(a) (Lp(a)), and who are on background inclisiran treatment for elevated low-density lipoprotein cholesterol (LDL-C).

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: RECRUITING
Target N:	340

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

Not Provided

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.2 Exclusion Criteria

- * Prior treatment with inclisiran
- * Any other PCSK9 inhibitor (e.g., evolocumab, alirocumab) use within 4 months prior to Screening visit
- * Uncontrolled hypertension at Randomization/Baseline visit
- * Heart failure New York Heart Association (NYHA) class IV at Screening visit or at Randomization/Baseline visit (Day 1)
- * Triglycerides ≥ 400 mg/dL at Screening visit
- * History of malignancy of any organ system within the past 5 years
- * Myocardial infarction, stroke or other major bleeding, coronary or lower limb re vascularization, major cardiac or non-cardiac surgery between Screening visit and Randomization/Baseline visit (Day 1)
- * Central laboratory reported platelet count $< 140,000$ per mm³
- * Active liver disease or hepatic dysfunction at Screening visit
- * Significant kidney disease at Screening visit
- * Pregnant or nursing women at Screening visit
- * Any uncontrolled chronic or serious medical condition which may pose an immediate risk to clinical stability of the study participant at Screening visit

* Other protocol-defined inclusion/exclusion criteria may apply.

11. Study Identifiers & Governance

Primary ID:	409288059304424177
Registry Number:	NCT06813911
Sponsor:	Novartis
Study Title:	Lp(a) Lowering Study of Pelacarsen (TQJ230) With Background Inclisiran in Participants With Elevated Lp(a) and Established ASCVD

15. Sign-off & Approval

Principal Investigator: _____	Date: _____
Clinical Operations Lead: _____	Date: _____
Lead Statistician: _____	Date: _____
