

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Single Arm, Open Label Multicentre Extension Study To Evaluate The Effectiveness And Safety Of Ocrelizumab In Patients With Multiple Sclerosis Previously Enrolled In A F. Hoffmann-La Roche Sponsored Ocrelizumab Phase IIIb/IV Clinical Trials
Short Title:	This is an Extension Study of the Roche P-trials to Investigate Safety and Effectiveness of Ocrelizumab in Participants With Multiple Sclerosis (MS)
Protocol Number:	504857113401145913
NCT Number:	NCT03599245
Sponsor Name:	Roche
Investigational Product:	ocrelizumab
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Time to onset of CDP sustained for at least 24 weeks and for at least 48 weeks 2. Percentage of participants who have confirmed disability improvement (CDI), CDP for at least 24 weeks and for at least 48 weeks yearly and over the duration of the treatment 3. Percentage of participants who have improved, stable or worsened disability compared with baseline: Improved, stable or worsened disability is measured by expanded disability status scale (EDSS) (annually/by epoch and over duration of the study) Stable EDSS is defined as EDSS change +/- 0.5. Worsening is ≥ 0.5 increase of EDSS, Improvement is ≥ 0.5 decrease of EDSS
Secondary Obj.:	1. Time to first protocol-defined event of disease activity 2. Time to first relapse 3. Annualized relapse rate

2.2 Background & Rationale

This extension study will evaluate the effectiveness and safety of ocrelizumab in multiple sclerosis (MS) participants who were previously enrolled in a F. Hoffmann-La Roche (Roche) sponsored ocrelizumab phase IIIb/IV trial (i.e. the Parent, P-trial).

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: COMPLETED
Target N:	1055

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * Signed Informed Consent Form
- * Able to comply with the study protocol, in the investigator's judgment
- * Completed the treatment period of Roche sponsored ocrelizumab P-trials

4.2 Exclusion Criteria

- * Hypersensitivity to ocrelizumab or to any of its excipients.
- * Participantss in a severely immunocompromised state until the condition resolves.
- * Evidence of any adverse event potentially attributable to ocrelizumab, for which the local label recommends permanent discontinuation.
- * Existence of a contra-indication as per SmPC
- * Prohibited concomitant medication as specified in protocol
- * Participants intending to become pregnant during the study or within 6 months after the last dose of the study drug in the parent study

11. Study Identifiers & Governance

Primary ID: 504857113401145913

Registry Number: NCT03599245

Sponsor: Roche

Study Title: This is an Extension Study of the Roche P-trials to Investigate Safety and Effectiveness of Ocrelizumab in Participants With Multiple Sclerosis (MS)

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____
