

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Phase IV, Prospective Single Arm Study of Safety and Efficacy of Votubia (Everolimus) in Taiwanese Adults With Tuberous Sclerosis Complex Who Have Renal Angiomyolipoma
Short Title:	A Phase IV Study of Safety and Efficacy of Everolimus in Taiwanese Patients With Tuberous Sclerosis Complex Who Have Renal Angiomyolipoma (TSC-AML)
Protocol Number:	621134017657881556
NCT Number:	NCT05252585
Sponsor Name:	Novartis
Investigational Product:	everolimus
Phase:	PHASE4
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Percentage of participants with adverse events (AEs), Serious AEs (SAEs) and AEs of special interest (AESI): Percentage of participants with AEs, SAEs and AESIs.
Secondary Obj.:	1. Angiomyolipoma (AML) response rate 2. AML progression rate 3. Percentage of participants with laboratory abnormalities

2.2 Background & Rationale

The purpose of this prospective study is to assess the safety and efficacy of everolimus in Taiwanese patients with renal angiomyolipoma (AML) associated with tuberous sclerosis complex (TSC) . Only patients who fulfil the local reimbursement criteria of everolimus for TSC-AML will be included in this study.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE4, Status: ACTIVE_NOT_RECRUITING
Target N:	4

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- Adult male or female patients from ? 18 years of age.
- Signed informed consent must be obtained prior to participation in the study.
- Participants with TSC associated with renal AML which is eligible for treatment with everolimus per local reimbursement criteria.

4.2 Exclusion Criteria

- Patients with severe hepatic impairment (Child-Pugh class C)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

2. Any severe and/or uncontrolled medical conditions.
3. Pregnant or breast-feeding females.
4. Patients with hypersensitivity to the active substance, to other rapamycin derivatives, or to any of the excipients.

11. Study Identifiers & Governance

Primary ID: 621134017657881556

Registry Number: NCT05252585

Sponsor: Novartis

Study Title: A Phase IV Study of Safety and Efficacy of Everolimus in Taiwanese Patients With Tuberous Sclerosis Complex Who Have Renal Angiomyolipoma (TSC-AML)

15. Sign-off & Approval
