

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Phase III Study of Trastuzumab Deruxtecan (T-DXd) With or Without Pertuzumab Versus Taxane, Trastuzumab and Pertuzumab in HER2-positive, First-line Metastatic Breast Cancer (DESTINY-Breast09)
Short Title:	Trastuzumab Deruxtecan (T-DXd) With or Without Pertuzumab Versus Taxane, Trastuzumab and Pertuzumab in HER2-positive Metastatic Breast Cancer (DESTINY-Breast09)
Protocol Number:	272915588513506993
NCT Number:	NCT04784715
Sponsor Name:	AstraZeneca
Investigational Product:	oxycodone
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Progression Free Survival (PFS) by Blinded Independent Central Review (BICR) assessment: Defined as time from date of randomisation until the date of objective radiological disease progression according to Blinded Independent Central Review (BICR) using RECIST 1.1 or death by any cause.
Secondary Obj.:	1. Progression Free Survival (PFS) by Investigator assessment 2. Overall Survival (OS) 3. Objective Response Rate (ORR) by BICR and Investigator assessment

2.2 Background & Rationale

The study will evaluate the efficacy and safety of trastuzumab deruxtecan (also known as T-DXd, DS-8201a), either alone or in combination with pertuzumab, in treating patients with Human epidermal growth factor receptor 2 (HER2)-positive breast cancer as a first line of treatment in the metastatic setting.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: ACTIVE_NOT_RECRUITING
Target N:	1157

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Patients must be ≥18 years of age
- * Pathologically documented breast cancer that:

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. is advanced or metastatic
 2. is locally assessed and prospectively centrally confirmed as HER2-positive (IHC3+ or ISH+)
 3. is documented by local testing as hormone receptor (HR)-positive or HR-negative disease in the metastatic setting
- * No prior chemotherapy or HER2-targeted therapy for advanced or metastatic breast cancer or only 1 previous line of endocrine therapy in the metastatic setting. Participants who have received chemotherapy or HER2-targeted therapy in the neo-adjuvant or adjuvant setting are eligible if $\geq$ 6 months from treatment to metastatic diagnosis.
 - * Has protocol-defined adequate organ and bone marrow function
 - * ECOG performance status 0 or 1

Key Exclusion Criteria:

- * Ineligible for any of the agents on the study.
- * Any substance abuse or other medical conditions that, in the investigator's opinion, may interfere with subject's participation or study results
- * Patients with spinal cord compression or clinically active central nervous system metastases. Participants with clinically inactive brain metastases or treated brain metastases that are no longer symptomatic may be included in the study.
- * Active or prior documented interstitial lung disease (ILD)/pneumonitis or suspected ILD/pneumonitis that cannot be ruled out by imaging at screening
- * Prior randomization or treatment in a previous trastuzumab deruxtecan study regardless of treatment arm assignment

4.2 Exclusion Criteria

- * Ineligible for any of the agents on the study.
- * Any substance abuse or other medical conditions that, in the investigator's opinion, may interfere with subject's participation or study results
- * Patients with spinal cord compression or clinically active central nervous system metastases. Participants with clinically inactive brain metastases or treated brain metastases that are no longer symptomatic may be included in the study.
- * Active or prior documented interstitial lung disease (ILD)/pneumonitis or suspected ILD/pneumonitis that cannot be ruled out by imaging at screening
- * Prior randomization or treatment in a previous trastuzumab deruxtecan study regardless of treatment arm assignment

11. Study Identifiers & Governance

Primary ID:	272915588513506993
Registry Number:	NCT04784715
Sponsor:	AstraZeneca
Study Title:	Trastuzumab Deruxtecan (T-DXd) With or Without Pertuzumab Versus Taxane, Trastuzumab and Pertuzumab in HER2-positive Metastatic Breast Cancer (DESTINY-Breast09)

15. Sign-off & Approval
