

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Randomized, Open-label, Multicenter, Phase 3 Trial of Repotrectinib Versus Crizotinib in Participants With Locally Advanced or Metastatic Tyrosine Kinase Inhibitor (TKI)-naïve ROS1-positive Non-Small Cell Lung Cancer (NSCLC) (TRIDENT-3)
Short Title:	A Study of Repotrectinib Versus Crizotinib in Participants With Locally Advanced or Metastatic Tyrosine Kinase Inhibitor (TKI)-naïve ROS1-positive Non-Small Cell Lung Cancer (NSCLC) (TRIDENT-3)
Protocol Number:	69993455034349488
NCT Number:	NCT06140836
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	crizotinib
Phase:	PHASE3
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Progression-free Survival (PFS) as per Blinded Independent Central Review (BICR) according to Response Evaluation Criteria in Solid Tumors (RECIST) v1.1
Secondary Obj.:	1. Overall Survival (OS) 2. Overall Response Rate (ORR) as per BICR according to RECIST v1.1 3. ORR as per Investigator according to RECIST v1.1

2.2 Background & Rationale

The purpose of this study is to evaluate the efficacy and safety of repotrectinib and crizotinib in participants with locally advanced or metastatic TKI-naïve ROS1-positive non-small cell lung cancer (NSCLC).

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE3, Status: ACTIVE_NOT_RECRUITING
Target N:	190

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Participant has histologically or cytologically confirmed diagnosis of locally advanced or metastatic NSCLC
- * Participant has a ROS1 gene rearrangement/fusion as detected by a local test.
- * At least 1 measurable lesion according to RECIST v1.1, as assessed by the investigator.
- * Participants must not be exposed previously with TKIs that demonstrated activities in ROS1-positive NSCLC
- * Up to 1 prior line of systemic treatment for NSCLC is permitted
- * ECOG Performance Status ? 2

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.2 Exclusion Criteria

- * Symptomatic brain metastases or symptomatic leptomeningeal involvement.
- * History of previous cancer requiring therapy within the previous 2 years, except for NSCLC under study, squamous cell or basal-cell carcinoma of the skin, or any in situ carcinoma that has been completely resected.
- * Known tumor targetable co-mutations or rearrangements
- * Clinically significant cardiovascular disease (either active or within 6 months prior to enrollment)

Note: Other protocol-defined inclusion/exclusion criteria apply

11. Study Identifiers & Governance

Primary ID:	69993455034349488
Registry Number:	NCT06140836
Sponsor:	Bristol Myers Squibb
Study Title:	A Study of Repotrectinib Versus Crizotinib in Participants With Locally Advanced or Metastatic Tyrosine Kinase Inhibitor (TKI)-naïve ROS1-positive Non-Small Cell Lung Cancer (NSCLC) (TRIDENT-3)

15. Sign-off & Approval
