

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

## 1. Administrative & Study Identification

|                          |                                                                                                                                                                                                         |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Full Study Title:        | A Phase 3, Randomized, Double-Blind, Placebo-Controlled, Parallel Group Study to Evaluate the Safety and Efficacy of KarXT + KarX-EC for the Treatment of Agitation Associated With Alzheimer's Disease |
| Short Title:             | A Phase 3 Study to Evaluate the Safety and Efficacy of KarXT + KarX-EC for the Treatment of Agitation Associated With Alzheimer's Disease (ADAGIO-1)                                                    |
| Protocol Number:         | 957664077916425312                                                                                                                                                                                      |
| NCT Number:              | NCT07011732                                                                                                                                                                                             |
| Sponsor Name:            | Bristol Myers Squibb                                                                                                                                                                                    |
| Investigational Product: | trospium                                                                                                                                                                                                |
| Phase:                   | PHASE3                                                                                                                                                                                                  |
| Medical Monitor:         | [Not Provided in Posting]                                                                                                                                                                               |

## 2. Study Synopsis & Rationale

### 2.1 Study Objective

|                    |                                                                                                                                                                                                                                   |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Primary Objective: | 1. Mean change from baseline on the Cohen-Mansfield Agitation Inventory-International Psychogeriatric Association (CMAI-IPA) total score at Week 14                                                                               |
| Secondary Obj.:    | 1. Mean change from baseline on the Clinical Global Impressions-Severity (CGI-S) at Week 14<br>2. Mean change from baseline on the CMAI-IPA Domains at Week 14<br>3. Mean change from baseline on the CMAI Total Score at Week 14 |

### 2.2 Background & Rationale

The purpose of this study is to evaluate the efficacy and safety of KarXT + KarX-EC in adult participants with agitation related to Alzheimer's Disease.

## 3. Study Design & Methodology

|                   |                                                         |
|-------------------|---------------------------------------------------------|
| Design Framework: | Type: INTERVENTIONAL, Phase: PHASE3, Status: RECRUITING |
| Target N:         | 352                                                     |

## 4. Subject Selection (Eligibility Criteria)

### 4.1 Inclusion Criteria

Not Provided

### 4.2 Exclusion Criteria

Not Provided

## 11. Study Identifiers & Governance

|             |                    |
|-------------|--------------------|
| Primary ID: | 957664077916425312 |
|-------------|--------------------|

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

**Registry Number:** NCT07011732

**Sponsor:** Bristol Myers Squibb

**Study Title:** A Phase 3 Study to Evaluate the Safety and Efficacy of KarXT + KarX-EC for the Treatment of Agitation Associated With Alzheimer's Disease (ADAGIO-1)

## 15. Sign-off & Approval

Principal Investigator: \_\_\_\_\_ Date: \_\_\_\_\_

Clinical Operations Lead: \_\_\_\_\_ Date: \_\_\_\_\_

Lead Statistician: \_\_\_\_\_ Date: \_\_\_\_\_
