2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Confirmed objective response rate (ORR) based on investigator assessment using Response Evaluation Criteria in Solid Tumors Version 1.1 (RECIST v1.1) criteria: Confirmed ORR per RECIST v1.1 is defined as the proportion of participants whose best overall response is a confirmed complete response (CR) or partial response (PR) per RECIST v1.1.
Secondary Obj.:	1. Duration of response (DOR) based on investigator assessment using RECIST v1.1 criteria 2. Progression-free survival (PFS) based on investigator assessment using RECIST v1.1 criteria 3. ORR per iRECIST by investigator assessment

2.2 Background & Rationale

This trial will find out whether brentuximab vedotin and pembrolizumab work together to treat different types of cancer. There will be several different types of cancer studied in the trial. The cancer must have spread to other parts of the body (metastatic).
