

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 2, Multicenter, Single-blinded, Randomized Study to Evaluate the Pharmacokinetics and Safety of Sotatercept (MK-7962) Administered Using Either a Weight-based or Weight-banded Approach in Participants With Pulmonary Arterial Hypertension (PAH) on Standard of Care
Short Title:	A Clinical Study of Sotatercept (MK-7962) in People With Pulmonary Arterial Hypertension (PAH) (MK-7962-024)
Protocol Number:	243156849879579225
NCT Number:	NCT06664801
Sponsor Name:	Merck
Investigational Product:	Sotatercept
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Steady-State Average Serum Concentrations of Sotatercept (Cavg): Steady-state Cavg of sotatercept will be reported. 2. Number of Participants Who Experience One or More Adverse Events (AEs): An AE is a health problem that happens or worsens during a study. Number of participants who experience an AE will be reported. 3. Number of Participants who Discontinue Study Treatment due to an Adverse Event: An AE is a health problem that happens or worsens during a study. Number of participants who discontinue study treatment will be reported.
--------------------	---

Secondary Obj.:	1. Initial Dose Average Serum Concentrations of Sotatercept (Cavg)
-----------------	--

2.2 Background & Rationale

Researchers are looking for other ways to treat people with PAH. In PAH, the blood vessels in the lungs become thick and narrow, which makes it harder for blood to flow to the lungs.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE2, Status: ACTIVE_NOT_RECRUITING
Target N:	160

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

* Has documented diagnostic Right Heart Catheterization, with the diagnosis of World Health Organization (WHO) Pulmonary Atrial Hypertension (PAH) Group 1 in any of the following subtypes: Idiopathic PAH, Heritable PAH,

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

Drug/toxin-induced PAH, PAH associated with connective tissue disease, PAH associated with simple, congenital systemic-to-pulmonary shunts at least 1 year following repair

* Has symptomatic PAH classified as WHO Functional Class II or III

4.2 Exclusion Criteria

* Has a weight of ≤ 35 kg

* Has a diagnosis of PH WHO Groups 2, 3, 4, or 5

* Has a diagnosis of the following PAH Group 1 subtypes: HIV-associated PAH, PAH associated with portal hypertension, Exclusion in PAH Group 1 should also include schistosomiasis-associated PAH, pulmonary veno occlusive disease and pulmonary capillary hemangiomatosis

* Has uncontrolled systemic hypertension

* Has a history of pneumonectomy

* Has a history of known pericardial constriction

* Has a history of restrictive cardiomyopathy

* Has history of atrial septostomy (within 180 days prior to study start)

* Has personal or family history of long QT syndrome

* Has history of coronary artery disease (myocardial infarction, percutaneous coronary intervention, coronary artery bypass, graft surgery, or cardiac anginal chest pain) (within 6 months prior to study start)

* Has a cerebrovascular accident (within 3 months prior to study start)

* Has significant ($\geq 2+$ regurgitation) mitral regurgitation or aortic regurgitation valvular disease

* Has untreated more than mild obstructive sleep apnea

* Has known malignancy that is progressing or has required active treatment within the past 5 years

* Has recently started (within 12 months prior to study start) or has plans to start weight loss medication or enter a weight loss program during the study period

* Has a previous (within 3 years) or planned (during the study) obesity treatment with surgery or a weight-loss device

11. Study Identifiers & Governance

Primary ID: 243156849879579225

Registry Number: NCT06664801

Sponsor: Merck

Study Title: A Clinical Study of Sotatercept (MK-7962) in People With Pulmonary Arterial Hypertension (PAH) (MK-7962-024)
