

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase II, Single Arm, Multicenter Open Label Trial to Determine the Efficacy and Safety of Tisagenlecleucel (CTL019) in Adult Patients With Refractory or Relapsed Follicular Lymphoma
Short Title:	Efficacy and Safety of Tisagenlecleucel in Adult Patients With Refractory or Relapsed Follicular Lymphoma
Protocol Number:	32808306644895204
NCT Number:	NCT03568461
Sponsor Name:	Novartis
Investigational Product:	tisagenlecleucel
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Complete Response Rate (CRR) Per Independent Review Committee (IRC) Assessment: Complete response rate was defined as the percentage of participants with a best overall response (BOR) of complete response (CR) recorded from tisagenlecleucel infusion until progressive disease or start of new anticancer therapy, whichever came first. CRR was determined by an independent review committee (IRC) and was based on Lugano 2014 classification response criteria. The radiological response is first obtained from CT and PET studies according to the Lugano 2014 criteria. CT response is based on anatomical measurements of index/non-index/new lesions and spleen length. The possible response outcomes are complete response (CR), partial response (PR), stable disease (SD), or progressive disease (PD). PET response based on a 5-point scale (5PS) or Deauville score. The possible outcomes for PET response are complete metabolic response (CMR), partial metabolic response (PMR), no metabolic response (NMR), or progressive metabolic disease (PMD).
Secondary Obj.:	1. Overall Response Rate (ORR) Per IRC Assessment 2. Duration of Response (DOR) Per IRC 3. Progression Free Survival (PFS)

2.2 Background & Rationale

This is a multi-center, phase II study to determine the efficacy and safety of tisagenlecleucel in adult patients with relapsed or refractory FL.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE2, Status: COMPLETED
Target N:	98

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Refractory or relapsed Follicular Lymphoma (Grade 1, 2, 3A)
- * Radiographically measurable disease at screening

4.2 Exclusion Criteria

- * Evidence of histologic transformation
- * Follicular Lymphoma Grade 3B
- * Prior anti-CD19 therapy
- * Prior gene therapy
- * Prior adoptive T cell therapy
- * Prior allogeneic hematopoietic stem cell transplant
- * Active CNS involvement by malignancy

Other protocol-defined Inclusion/Exclusion criteria may apply.

11. Study Identifiers & Governance

Primary ID:	32808306644895204
Registry Number:	NCT03568461
Sponsor:	Novartis
Study Title:	Efficacy and Safety of Tisagenlecleucel in Adult Patients With Refractory or Relapsed Follicular Lymphoma

15. Sign-off & Approval

Principal Investigator: _____	Date: _____
Clinical Operations Lead: _____	Date: _____
Lead Statistician: _____	Date: _____
