

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	An International Prospective Open-label, Multi-center, Randomized, Non-comparative Phase II Study of Lutetium [177Lu] Vipivotide Tetraxetan (AAA617) Alone and Lutetium [177Lu] Vipivotide Tetraxetan (AAA617) in Combination With Androgen Receptor Pathway Inhibitors in Patients With PSMA PET Scan Positive Castration-Resistant Prostate Cancer
Short Title:	A Phase II Study of AAA617 Alone and AAA617 in Combination With ARPI in Patients With PSMA PET Scan Positive CRPC
Protocol Number:	49405554200369064
NCT Number:	NCT05849298
Sponsor Name:	Novartis
Investigational Product:	amfepramone
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. PSA response: PSA response is defined as the time of PSA nadir value of $\leq$ 0.2 ng/mL is confirmed by a second (the next) PSA measurement at least 4 weeks later
Secondary Obj.:	1. Metastatic Free Survival (MFS) 2. Radiographic Progression Free Survival (rPFS) 3. Overall Survival (OS)

2.2 Background & Rationale

The purpose of this study is to evaluate the efficacy and safety of AAA617 alone (Lutetium $[^{177}\text{Lu}]$ vipivotide tetraxetan) and in combination with an Androgen Receptor Pathway Inhibitors (ARPI) in participants with PSMA-positive, castration-resistant prostate cancer and no evidence of metastasis in conventional imaging (CI) (i.e., CT/MRI and bone scans). Approximately 80 participants will be randomized.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE2, Status: RECRUITING
Target N:	80

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

Not Provided

4.2 Exclusion Criteria

Not Provided

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

11. Study Identifiers & Governance

Primary ID: 49405554200369064

Registry Number: NCT05849298

Sponsor: Novartis

Study Title: A Phase II Study of AAA617 Alone and AAA617 in Combination With ARPI in Patients With PSMA PET Scan Positive CRPC

15. Sign-off & Approval
