

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 1/2, Multi-Center, Open-Label, Dose-Finding Study to Evaluate the Safety, Tolerability, Pharmacokinetics, Pharmacodynamics, and Preliminary Efficacy of BMS-986458, Alone and in Combination With Anti-lymphoma Agents in Participants With Relapsed/Refractory Non-Hodgkin Lymphomas (R/R NHL)
Short Title:	A Study to Assess BMS-986458 Alone and in Combination With Anti-lymphoma Agents in Relapsed/Refractory Non-Hodgkin Lymphomas
Protocol Number:	1011146812382055988
NCT Number:	NCT06090539
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	rituximab
Phase:	PHASE1, PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of participants with adverse events (AEs) 2. Number of participants with serious adverse events (SAEs) 3. Number of participants with AEs meeting protocol-defined dose-limiting toxicity (DLT) criteria
Secondary Obj.:	1. Maximum concentration (Cmax) 2. Time of maximum concentration (Tmax) 3. Area under the plasma concentration-time curve within a dosing interval [AUC(TAU)]

2.2 Background & Rationale

The purpose of this study is to evaluate the safety, tolerability, drug levels, and preliminary biological and clinical activity of BMS-986458, a bifunctional cereblon-dependent ligand-directed degrader of B-cell lymphoma 6 (BCL6), as a single agent and in combination with anti-lymphoma agents in participants with relapsed/refractory non-Hodgkin Lymphoma.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE1, PHASE2, Status: RECRUITING
Target N:	308

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

* Participants ? 18 years of age with R/R NHL (including DLBCL \[ie, DLBCL not otherwise specified (NOS) and diffuse large B-Cell lymphoma/high-grade B-Cell lymphoma with MYC and BCL2 rearrangements\], and FL):

* For R/R DLBCL (de novo) and FL 3b: following at least 2 prior lines of therapy (eg, first-line combination

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

chemotherapy regimen containing rituximab, anthracycline, an alkylating agent, and steroids and at least one additional treatment).

- * For R/R DLBCL (transformed lymphoma): following at least 2 prior lines of therapy which must have been administered after transformation.

- * For R/R FL (except for FL 3b): following at least 2 prior lines of therapy and meeting treatment criteria at the time of enrollment based on investigator's assessment.

- * Participant must have measurable disease (defined by at least one FDG-avid lesion for FDG-avid disease and one bi-dimensionally measurable disease on cross sectional imaging by computed tomography or magnetic resonance imaging with at least one lesion ≥ 1.5 cm in the transverse diameter).

- * Participants must accept and follow pregnancy prevention plan.

4.2 Exclusion Criteria

- * Participants must not have an Eastern Cooperative Oncology Group (ECOG) performance status ≥ 2 .

- * Participants with an inability to comply with listed restrictions, precautions and prohibited treatments.

- * Participants must not have prior CAR-T, or radiotherapy ≥ 4 weeks, systemic anticancer treatment ≥ 5 half-lives or 4 weeks, allogeneic SCT ≥ 6 months (only applicable to BMS-986458 single agent or rituximab combination cohorts), or autologous SCT ≥ 3 months prior to study intervention initiation.

- * In BMS-986458 + T-cell engager combination cohorts: Participants must not have prior alloSCT or solid organ transplantation, history of confirmed progressive multifocal leukoencephalopathy (PML); known or suspected history of hemophagocytic lymphohistiocytosis (HLH); known or suspected chronic active Epstein-Barr (EBV) infection.

- * Participants must not have any condition, including significant acute or chronic medical illness, active or uncontrolled infection, or the presence of laboratory abnormalities, that places participants at unacceptable risk if participating in this study.

- * Participants must not have known or suspected central nervous system involvement.

11. Study Identifiers & Governance

Primary ID: 1011146812382055988

Registry Number: NCT06090539

Sponsor: Bristol Myers Squibb

Study Title: A Study to Assess BMS-986458 Alone and in Combination With Anti-lymphoma Agents in Relapsed/Refractory Non-Hodgkin Lymphomas

15. Sign-off & Approval
