

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	An Open-label, Multi-center Phase II Study of Durvalumab and Tremelimumab With Lenvatinib as First-line Treatment in Patients With Unresectable Hepatocellular Carcinoma
Short Title:	Durvalumab and Tremelimumab With Lenvatinib as First-line Treatment in Patients With Unresectable Hepatocellular Carcinoma
Protocol Number:	1138203022013343659
NCT Number:	NCT07081633
Sponsor Name:	AstraZeneca
Investigational Product:	tremelimumab
Phase:	PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Progression free survival (PFS) per RECIST 1.1: Efficacy endpoint
Secondary Obj.:	1. Grade ≥ 3 TRAE within 6 months after the initiation of study intervention 2. Overall Survival (OS) 3. Objective Response Rate (ORR) per RECIST 1.1

2.2 Background & Rationale

This is a Phase II, single-arm, multicentre study, assessing the efficacy and safety of durvalumab and tremelimumab with lenvatinib in participants with unresectable HCC.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE2, Status: RECRUITING
Target N:	114

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Confirmed HCC based on histopathological findings from tumor tissues or radiologically findings.
- * Must not have received prior systemic therapy for unresectable HCC.
- * Barcelona Clinic Liver Cancer (BCLC) stage B (that is not eligible for locoregional therapy) or stage C.
- * Child-Pugh Score class A.
- * ECOG performance status of 0 or 1 at enrollment.
- * At least 1 measurable lesion per RECIST 1.1 guidelines

4.2 Exclusion Criteria

- * Any unresolved toxicity National Cancer Institute (NCI) Common Terminology Criteria for Adverse Event (CTCAE)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

Grade ?2 from previous anticancer therapy.

* History of hepatic encephalopathy within past 12 months or requirement for medications to prevent or control encephalopathy.

* Clinically meaningful ascites.

* Patients with main portal vein thrombosis.

* Active or prior documented GI bleeding.

* Patient currently exhibits symptomatic or uncontrolled hypertension.

* Patients co-infected with HBV and HCV, or co-infected with HBV and hepatitis D virus (HDV)

* Uncontrolled intercurrent illness

11. Study Identifiers & Governance

Primary ID: 1138203022013343659

Registry Number: NCT07081633

Sponsor: AstraZeneca

Study Title: Durvalumab and Tremelimumab With Lenvatinib as First-line Treatment in Patients With Unresectable Hepatocellular Carcinoma
