

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 1/2 Study of BMS-986482 as Monotherapy or Combination Therapy in Participants With Advanced Solid Tumors
Short Title:	A Study of BMS-986482 Alone or as Combination Therapy in Participants With Advanced Solid Tumors
Protocol Number:	14719934922846212
NCT Number:	NCT06697197
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	bevacizumab
Phase:	PHASE1, PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of participants with Adverse Events (AEs) as assessed by National Cancer Institute -Common Terminology Criteria for Adverse Events version 5.0 (NCI-CTCAE v5.0) 2. Number of participants with Serious AEs (SAEs) as assessed by NCI-CTCAE v5.0 3. Number of participants with AEs meeting protocol-defined Dose-Limiting Toxicity (DLT) criteria as assessed by NCI-CTCAE v5.0
Secondary Obj.:	1. Concentration at the end of infusion (Cmax) 2. Time of maximum observed concentration (Tmax) 3. Area under the concentration-time curve in one dosing interval (AUC(TAU))

2.2 Background & Rationale

The purpose of this study is to test the safety and efficacy of BMS-986482 alone and as combination therapy in participants with advanced solid tumors.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE1, PHASE2, Status: RECRUITING
Target N:	413

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * All participants must have a histologically or cytologically confirmed, advanced, unresectable/metastatic, solid malignancy measurable by RECIST v1.1, and have received, be refractory to, ineligible for, intolerant of, or refused existing therapy(ies) known to provide clinical benefit for the condition of the participant.
- * Participant must be ≥ 18 years or the legal age of consent in the jurisdiction in which the study is taking place,

inclusive, at the time of signing the ICF.

4.2 Exclusion Criteria

- * History of life threatening immune mediated toxicity related to prior T-cell agonist or checkpoint inhibitor therapy, except those that are unlikely to re-occur with standard countermeasures.
- * Any significant acute or chronic medical illness which would interfere with study intervention or follow-up in the opinion of the investigator.
- * Other protocol-defined Inclusion/Exclusion criteria apply.

11. Study Identifiers & Governance

Primary ID:	14719934922846212
Registry Number:	NCT06697197
Sponsor:	Bristol Myers Squibb
Study Title:	A Study of BMS-986482 Alone or as Combination Therapy in Participants With Advanced Solid Tumors

15. Sign-off & Approval
