

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 1/2 Study to Evaluate the Safety and Efficacy of Patritumab Deruxtecan in Gastrointestinal Cancers
Short Title:	Study of Patritumab Deruxtecan in Participants With Gastrointestinal Cancers (MK-1022-011) (HERTHENA-PanTumor02)
Protocol Number:	240547923952254660
NCT Number:	NCT06596694
Sponsor Name:	Merck
Investigational Product:	patritumab deruxtecan
Phase:	PHASE1, PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of Participants Experiencing Dose-Limiting Toxicity (DLT) (Dose-Escalation Phase): DLT will be defined as any drug-related adverse event observed during the DLT evaluation period that results in a change to a given dose or a delay in initiating the next 21-day cycle. The number of participants in the dose-escalation phase who experience a DLT will be presented. 2. Number of Participants with One or More Adverse Events (AEs): An AE is defined as any unfavorable and unintended sign, symptom, disease, or worsening of preexisting condition temporally associated with study treatment and irrespective of causality to study treatment. The number of participants who experience an AE will be presented. 3. Number of Participants who Discontinue Study Intervention Due to an AE: An AE is defined as any unfavorable and unintended sign, symptom, disease, or worsening of preexisting condition temporally associated with study treatment and irrespective of causality to study treatment. The number of participants who discontinue study treatment due to an AE will be presented.
Secondary Obj.:	1. Duration of Response (DOR) 2. Progression Free Survival (PFS) 3. Overall Survival (OS)

2.2 Background & Rationale

Researchers want to learn if patritumab deruxtecan (MK-1022) can treat certain gastrointestinal (GI) cancers. The GI cancers being studied are advanced (the cancer has spread to other parts of the body). The goals of this study are to learn:

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE1, PHASE2, Status: RECRUITING
Target N:	180

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

The main inclusion criteria include but are not limited to the following:

* Has one of the following cancers:

- * Unresectable or metastatic colorectal cancer.
- * Advanced and/or unresectable biliary tract cancer (BTC)
- * Hepatocellular carcinoma (HCC) not amenable to locoregional therapy
- * Locally advanced unresectable or metastatic gastroesophageal cancer
- * Has received prior therapy for the cancer.
- * Has recovered from any side effects due to previous cancer treatment

4.2 Exclusion Criteria

The main exclusion criteria include but are not limited to the following:

- * Has a history of (noninfectious) interstitial lung disease (ILD) or pneumonitis that required steroids, or has current ILD or pneumonitis, and/or suspected ILD or pneumonitis that cannot be ruled out by standard diagnostic assessments at Screening
- * Has clinically severe respiratory compromise (based on the investigator's assessment) resulting from intercurrent pulmonary illnesses
- * Has evidence of any leptomeningeal disease
- * Has clinically significant corneal disease
- * Has uncontrolled, significant cardiovascular disease or cerebrovascular disease
- * Has evidence of ongoing uncontrolled systemic bacterial, fungal, or viral infection

11. Study Identifiers & Governance

Primary ID: 240547923952254660

Registry Number: NCT06596694

Sponsor: Merck

Study Title: Study of Patritumab Deruxtecan in Participants With Gastrointestinal Cancers (MK-1022-011) (HERTHENA-PanTumor02)

15. Sign-off & Approval
