

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	An Open-label, Multi-center, Phase 1/2 Study to Assess Safety, Cellular Kinetics and Exploratory Efficacy of Rapcabtagene Autoleucel in Participants With Difficult-to-treat Rheumatoid Arthritis and Severe, Refractory Sjogren's Disease With Organ Involvement
Short Title:	A Study to Assess Safety, Cellular Kinetics and Exploratory Efficacy of Rapcabtagene Autoleucel in Rheumatoid Arthritis and Sjogren's Disease
Protocol Number:	465314049293962271
NCT Number:	NCT07048197
Sponsor Name:	Novartis
Investigational Product:	ciltacabtagene autoleucel
Phase:	PHASE1, PHASE2
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of Participants with Adverse Events as a Measure of Safety and Tolerability: Safety parameters include vital signs, adverse events, laboratory parameters and ECG evaluation
Secondary Obj.:	1. Pharmacokinetic (PK) parameter: Cmax 2. PK parameter: Tmax 3. PK parameter: T1/2

2.2 Background & Rationale

A study to assess safety, cellular kinetics and exploratory efficacy of rapcabtagene autoleucel in rheumatoid arthritis and Sjogren's disease

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE1, PHASE2, Status: RECRUITING
Target N:	27

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Signed informed consent must be obtained prior to participation in the study
- * Men and women aged ? 18 years and ? 75 years at Screening For RA only
- * Diagnosis of rheumatoid arthritis
- * Treatment failure of standard of care therapies
- * Active disease For SjD only
- * Diagnosis of Sjogren's disease

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

* Active disease

4.2 Exclusion Criteria

- * BMI at Screening of ≥ 17 or ≤ 40 kg/m²
- * Clinically significant active, opportunistic, chronic or recurrent infection
- * Sexually active males unwilling to use a condom during intercourse from the time enrollment
- * Women of childbearing potential, unless they are using a highly effective method of contraception starting from the time of enrollment
- * Female participants who are pregnant, breastfeeding or intending to conceive during the course of the study
- * Inadequate organ function during screening
- * History of lymphoproliferative disease or any known malignancy or history of malignancy
- * History of bone marrow/hematopoietic stem cell or solid organ transplantation
- * Any psychiatric condition or disability making compliance with treatment or informed consent impossible

Other protocol-defined inclusion/exclusion criteria may apply.

11. Study Identifiers & Governance

Primary ID:	465314049293962271
Registry Number:	NCT07048197
Sponsor:	Novartis
Study Title:	A Study to Assess Safety, Cellular Kinetics and Exploratory Efficacy of Rapcabtagene Autoleucel in Rheumatoid Arthritis and Sjogren's Disease

15. Sign-off & Approval

Principal Investigator: _____	Date: _____
Clinical Operations Lead: _____	Date: _____
Lead Statistician: _____	Date: _____
