

1. Administrative & Study Identification

Full Study Title: A Nationwide Post-marketing Study on the Safety of Abatacept Treatment in Denmark Using the DANBIO Register **Short Title/Acronym:** DANBIO Abatacept Safety Study **Protocol Number:** IM101-803 (EUPAS31532) **NCT Number:** NCT05421442 **Sponsor Name:** Bristol-Myers Squibb **Investigational Product:** Abatacept (Orencia) **Phase of Development:** Phase IV (Post-marketing Observational) **Medical Monitor:** [Name and Contact Information]

2. Study Synopsis & Rationale

2.1 Study Objective **Primary Objective:** To evaluate the long-term safety of abatacept treatment in patients with Rheumatoid Arthritis (RA) and Psoriatic Arthritis (PsA) in Denmark, specifically regarding the incidence and potential risks of developing different types of cancer (malignancies). **Secondary Objectives:** To monitor the frequency of specific skin cancers (basal cell carcinoma, melanoma, squamous cell carcinoma) and other types of cancers in general over time in patients exposed to abatacept.

2.2 Background & Rationale To address the need for real-world long-term safety data. This study focuses on observing the safety profile of abatacept, a medication used to treat RA and PsA. Continuous post-marketing surveillance is necessary to gather more information on the long-term effects of abatacept and to ensure the treatment remains safe for patients over time, especially concerning the potential risk of developing various cancers. The study relies on the Danish Database of Biological Therapies (DANBIO).

3. Study Design & Methodology

3.1 Design Framework **Study Type:** Observational (Post-marketing Study) **Control Type:** Active Comparator / Background Population Rates (using registry data) **Blinding:** Open-label (None) **Randomization:** N/A

3.2 Planned Enrollment & Duration **Target N:** All eligible patients registered in the DANBIO database receiving abatacept **Number of Sites:** Nationwide (Denmark) **Estimated Study Start:** 13-Jun-2019 **Estimated Primary Completion:** 30-Oct-2025

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria 1. Confirmed diagnosis of Rheumatoid Arthritis (RA) or Psoriatic Arthritis (PsA). 2. Patients registered in the Danish Database of Biological Therapies (DANBIO). 3. Patients receiving or having historically received treatment with abatacept.

4.2 Exclusion Criteria 1. Patients without a confirmed diagnosis of RA or PsA. 2. Missing or incomplete registry data that impedes accurate safety analysis. 3. [Additional registry-specific exclusions per protocol]

5. Intervention & Treatment Plan

5.1 Investigational Regimen Dosage/Frequency: Administered per standard of care and individual physician's therapeutic decision. **Route of Administration:** Intravenous (IV) or Subcutaneous (SC) routine practice. **Duration of Treatment:** Variable (Real-world observational exposure duration).

5.2 Concomitant & Prohibited Therapy Permitted: Standard of care concomitant therapies for RA and PsA (e.g., csDMARDs). **Prohibited:** N/A (This is a non-interventional, observational study).

6. Study Timeline & Visit Schedule

Visit ID	Window (Days)	Key Activities/Procedures	:---
:---	:---	Screening	N/A Identification of eligible participants in the DANBIO register
Baseline	N/A Index date of abatacept initiation	Interim	Ongoing Continuous passive monitoring of health records and cancer diagnoses
End of Study	N/A Final data linkage with the Danish Cancer Registry and statistical analysis		

(Note: Patient visits are strictly dictated by routine clinical practice rather than study protocol.)

7. Outcome Measures (Endpoints)

7.1 Primary Endpoint Definition: Incidence rate and risk of developing overall malignancies in patients treated with abatacept. **Measurement Method:** Nationwide database linkage (Linking DANBIO data with the Danish Cancer Registry).

7.2 Secondary & Exploratory Endpoints Incidence of specific skin cancers, including basal cell carcinoma, melanoma, and squamous cell carcinoma.

8. Safety & Adverse Event Reporting

Adverse Event (AE) Monitoring: Retrospective and prospective monitoring of safety outcomes through health records and national databases. **Serious Adverse Events (SAEs):** Specific focus on cancer diagnoses extracted from validated government databases. **Data Monitoring Committee (DMC):** Internal protocol oversight in accordance with government database regulations.

9. Statistical Analysis Plan (SAP) Summary

Analysis Populations: All registered abatacept users in DANBIO diagnosed with RA or PsA. **Sample Size Justification:** Determined by the natural total number of abatacept-treated patients available in the nationwide register during the study timeframes. **Handling of Missing Data:** Handled through standard pharmacoepidemiological statistical methodologies suitable for large registry databases.

10. Quality Assurance & Regulatory Compliance

GCP Compliance: Conducted in accordance with Good Pharmacoepidemiology Practices (GPP) and national data protection laws. **Monitoring Plan:** Data is extracted from a validated national government database (DANBIO). **Audit Trail:** Data integrity and security are maintained through validated Danish health database tracking systems.

11. Study Identifiers & Governance

Primary ID: IM101-803 (EUPAS31532) **Registry Number:** NCT05421442 **Sponsor/Lead Organization:** Bristol-Myers Squibb **Study Title:** A Nationwide Post-marketing Study on the Safety of Abatacept Treatment in Denmark Using the DANBIO Register **Official Regulatory Title:** A Nationwide Post-marketing Study on the Safety of Abatacept Treatment in Denmark Using the DANBIO Register

12. Clinical Framework (Disease Specific)

Primary Condition: Rheumatoid Arthritis (RA) and Psoriatic Arthritis (PsA) **Diagnosis Threshold:** Clinically confirmed RA or PsA recorded in the DANBIO register **Medical Methodology:** Observational safety surveillance of Abatacept (Biologic Therapy) **Optimization Target:** Long-term safety and malignancy risk assessment

13. Study Procedures & Methodology

Management Pathway: Registry-based observational data collection
Education Protocol (HCP): N/A (Observational study; no new interventions)
Education Protocol (Patient): N/A (Observational study; no new interventions)
Quality Audit Mechanism: Data validation via the Danish Database of Biological Therapies (DANBIO)

14. Observation & Follow-Up Schedule

Total Duration: June 2019 to October 2025 (Approx. 332 weeks)
Onsite Visit Cadence: N/A (Routine clinical practice visits only)
Remote Monitoring Frequency: Continuous passive database linkage
Checklist Review Interval: N/A (Data extraction based on registry update intervals)

15. Sign-off & Approval

Role	Name	Signature	Date	:---	:---	:---	:---
