

1. Administrative & Study Identification

Full Study Title: A Multicenter, Cross-sectional Study to Evaluate the Conjunctiva and Tenon's Capsule Status of Healthy Subjects and in Participants With Neovascular Age-related Macular Degeneration (nAMD)/Diabetic Macular Edema (DME)
Short Title/Acronym: Conjunctiva and Tenon's Capsule Status Study
Protocol Number: MR45734
NCT Number: NCT06723288
Sponsor Name: Hoffmann-La Roche
Investigational Product: Spectral Domain-Optical Coherence Tomography (SD-OCT)
Phase of Development: N/A (Observational / Cross-sectional)
Medical Monitor: Medical Monitor, Hoffmann-La Roche

2. Study Synopsis & Rationale

2.1 Study Objective * **Primary Objective:** To obtain conjunctiva and Tenon's capsule thickness measurements in vivo using spectral domain-optical coherence tomography (SD-OCT) in participants with nAMD/DME and age-matched healthy subjects. * **Secondary Objectives:** N/A

2.2 Background & Rationale To evaluate the differences in conjunctiva and Tenon's capsule anatomy between healthy individuals and patients with nAMD/DME. Understanding the ocular surface and capsule thickness using SD-OCT helps to optimize intravitreal (IVT) injection protocols and manage potential complications associated with ocular treatments in these patient populations.

3. Study Design & Methodology

3.1 Design Framework * **Study Type:** Observational (Cross-sectional) * **Control Type:** Healthy Volunteer Control * **Blinding:** Open-label * **Randomization:** N/A

3.2 Planned Enrollment & Duration * **Target \$N\$:** 736 participants * **Number of Sites:** Multicenter (e.g., sites in Spain) * **Estimated Study Start:** 31-Dec-2024 * **Estimated Primary Completion:** 28-Nov-2025 (Study currently Completed)

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria 1. Male or female, ages ≥ 45 years. 2. Healthy volunteers or participants with a confirmed diagnosis of neovascular Age-related Macular Degeneration (nAMD) or Diabetic Macular Edema (DME).

4.2 Exclusion Criteria 1. Current or past treatment for glaucoma (only for healthy subjects). 2. Dry eye disease, except those treated exclusively with artificial tears. 3. Ocular hypertension treated with hypotensive drugs. 4. Pterygium or Strabismus. 5. Previous ocular surgery, excluding cataract surgery without scleral incision. 6. Current contact lens wearers, myopia with ≥ 6 diopters, or corneal transplant. 7. History of ocular surface inflammation or active/recent conjunctivitis infection. 8. Pregnancy. 9. Participant who has already received an IVT injection in the superotemporal quadrant (only for nAMD/DME participants).

5. Intervention & Treatment Plan

5.1 Investigational Regimen * **Dosage/Frequency:** Single evaluation (Diagnostic/imaging procedure). * **Route of Administration:** Ocular imaging (SD-OCT). * **Duration of Treatment:** One-time cross-sectional assessment.

5.2 Concomitant & Prohibited Therapy * **Permitted:** Artificial tears for dry eye disease. * **Prohibited:** Hypotensive drugs for ocular hypertension, contact lenses during the evaluation, or previous IVT injections in the superotemporal quadrant (for nAMD/DME participants).

6. Study Timeline & Visit Schedule

Visit ID	Window (Days)	Key Activities/Procedures
1	Screening/Baseline	Day 0 Informed Consent, Medical History, Ocular Examination, Eligibility confirmation
2	Imaging/End of Study	Day 0 SD-OCT Imaging, Assessment of Conjunctiva and Tenon's Capsule, Discharge

7. Outcome Measures (Endpoints)

7.1 Primary Endpoint * **Definition:** Conjunctiva and Tenon's capsule thickness status in healthy subjects vs. nAMD/DME participants. * **Measurement Method:** In vivo measurement using Spectral Domain-Optical Coherence Tomography (SD-OCT).

7.2 Secondary & Exploratory Endpoints * N/A

8. Safety & Adverse Event Reporting

- **Adverse Event (AE) Monitoring:** Routine evaluation during the single visit imaging procedure.
 - **Serious Adverse Events (SAEs):** Standard reporting timelines (within 24 hours of site awareness).
 - **Data Monitoring Committee (DMC):** Internal safety monitoring mechanisms managed by the sponsor (Hoffmann-La Roche).
-

9. Statistical Analysis Plan (SAP) Summary

- **Analysis Populations:** All enrolled subjects with evaluable SD-OCT scans (nAMD, DME, and Healthy Cohorts).
 - **Sample Size Justification:** $N = 736$ appropriately powered to detect meaningful differences in ocular surface structural thickness across the cohorts.
 - **Handling of Missing Data:** N/A (Single-visit cross-sectional data collection).
-

10. Quality Assurance & Regulatory Compliance

- **GCP Compliance:** This study will be conducted in accordance with Good Clinical Practice (GCP) and the Declaration of Helsinki.
 - **Monitoring Plan:** Routine site monitoring for data quality, protocol adherence, and image capture standards.
 - **Audit Trail:** eCRF locking and standardized imaging data storage compliance.
-

11. Study Identifiers & Governance

- **Primary ID:** MR45734
 - **Registry Number:** NCT06723288
 - **Sponsor/Lead Organization:** Hoffmann-La Roche
 - **Study Title:** Conjunctiva and Tenon's Capsule Status Study
 - **Official Regulatory Title:** A Multicenter, Cross-sectional Study to Evaluate the Conjunctiva and Tenon's Capsule Status of Healthy Subjects and in Participants With Neovascular Age-related Macular Degeneration (nAMD)/Diabetic Macular Edema (DME)
-

12. Clinical Framework (Ophthalmic Specific)

- **Primary Condition:** Neovascular Age-related Macular Degeneration (nAMD) & Diabetic Macular Edema (DME)
- **Diagnosis Threshold:** Clinical diagnosis of nAMD or DME
- **Medical Methodology:** SD-OCT Imaging

- **Optimization Target:** Anatomical thickness measurement for IVT optimization
-

13. Study Procedures & Methodology

- **Management Pathway:** Cross-sectional diagnostic ocular imaging
 - **Education Protocol (HCP):** Standardized training for SD-OCT capture
 - **Education Protocol (Patient):** N/A (Observational single-visit)
 - **Quality Audit Mechanism:** Centralized or standardized SD-OCT image reading and quality control
-

14. Observation & Follow-Up Schedule

- **Total Duration:** Single Visit (Cross-sectional)
 - **Onsite Visit Cadence:** Day 0 only
 - **Remote Monitoring Frequency:** N/A
 - **Checklist Review Interval:** N/A
-
