

1. Administrative & Study Identification

Full Study Title: A Study of BMS-986449 With and Without Nivolumab in Participants With Advanced Solid Tumors **Short Title/ Acronym:** BMS-986449 +/- Nivolumab in Advanced Solid Tumors **Protocol Number:** CA120-1001 **NCT Number:** NCT05888831 **Posting ID:** 578703125872769480 **Sponsor Name:** Bristol-Myers Squibb **Investigational Product:** BMS-986449 and Nivolumab **Phase of Development:** PHASE1, PHASE2 **Trial Status:** ACTIVE_NOT_RECRUITING (Active but not currently recruiting) **Medical Monitor:** Bristol-Myers Squibb Clinical Monitor

2. Study Synopsis & Rationale

2.1 Study Objective * **Primary Objective:** To evaluate the safety and efficacy of BMS-986449 alone and in combination with nivolumab in participants with advanced solid tumors. * **Secondary Objectives:** To determine the clinical benefit, pharmacokinetic profile, and pharmacodynamic properties of the investigational treatments in various solid tumor cohorts.

2.2 Background & Rationale To address the ongoing medical necessity for advanced oncological treatments. Specifically, the study aims to provide therapeutic options for patients who have histologically or cytologically confirmed advanced, unresectable, or metastatic solid malignancies, and who have received, are refractory to, are ineligible for, or are intolerant of existing therapies known to provide clinical benefit.

3. Study Design & Methodology

3.1 Design Framework * **Study Type:** Interventional * **Control Type:** Single-arm/Parallel (Dose Escalation and Expansion Cohorts) * **Blinding:** Open-label * **Randomization:** N/A (Non-randomized assignment to specific cohorts) * **Status Details:** Active but not currently recruiting

3.2 Planned Enrollment & Duration * **Targeted Enrollment:** 100 * **Number of Sites:** Multicenter * **Estimated Study Start:** 06-Jun-2023 * **Estimated Primary Completion:** 30-Sep-2026

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria 1. All participants must have a histologically or cytologically confirmed, advanced,

unresectable/metastatic solid malignancy (measurable by Response Evaluation Criteria in Solid Tumors [RECIST] v1.1). 2. Have received, be refractory to, ineligible for, or intolerant of existing therapy(ies) known to provide clinical benefit for the condition of the participant. 3. Tumor biopsy must be obtained for all participants (unless medically precluded). (Note: Part 1A may have a solid malignancy of any histology; Part 1B is restricted to participants with Non-small cell lung cancer [NSCLC]; Part 1C is restricted to participants with Triple-negative breast cancer [TNBC].)

4.2 Exclusion Criteria 1. History of Grade ≥ 3 toxicity related to prior T-cell agonist or checkpoint inhibitor therapy (e.g., anti-cytotoxic T-lymphocyte-associated antigen 4 [CTLA-4], or anti-PD-1/programmed death-ligand 1 [PD-L1] treatment, or any other antibody or drug specifically targeting T-cell co-stimulation or other immune checkpoint pathways) except those that are unlikely to re-occur with standard countermeasures. 2. Current or recent (within 3 months of study intervention administration) gastrointestinal disease or gastrointestinal surgery (e.g., intestinal/gastric/colon resection) that could impact the absorption of study intervention. 3. Any significant acute or chronic medical illness which would interfere with study intervention or follow-up in the opinion of the investigator.

5. Intervention & Treatment Plan

5.1 Investigational Regimen * **Dosage/Frequency:** Escalating and expansion doses of BMS-986449 administered either as a monotherapy or in combination with nivolumab. * **Route of Administration:** Intravenous (nivolumab) and Oral/IV (BMS-986449; oral indicated by GI absorption exclusion criteria). * **Nivolumab Details:** * **ATC Code:** L01FF01 * **Trade Names:** Opdualag, Opdivo * **EMA URLs:** * [Opdivo EPAR](#) * [Opdualag EPAR](#) * **Duration of Treatment:** Until disease progression, unacceptable toxicity, or subject withdrawal.

5.2 Concomitant & Prohibited Therapy * **Permitted:** Standard supportive care per institutional guidelines. * **Prohibited:** Prior targeted T-cell co-stimulation or immune checkpoint pathways leading to Grade ≥ 3 toxicity; concurrent unapproved therapies.

6. Study Timeline & Visit Schedule

Visit ID	Window (Days)	Key Activities/Procedures
Screening	Day -28 to 0	Informed Consent, Medical History, Baseline Scans, Tumor Biopsy
Baseline	Day 0	Enrollment, First Dose of BMS-986449 +/- Nivolumab
Interim	Every Cycle	Safety Labs, Efficacy Assessment (RECIST)

v1.1), PK/PD Draws | | **End of Study** | Variable | End of Treatment Visit, Final Vital Signs, AE Follow-up, Survival Follow-up |

7. Outcome Measures (Endpoints)

7.1 Primary Outcomes 1. Number of participants with Dose-Limiting Toxicities (DLTs) 2. Number of participants with Adverse Events (AEs) 3. Number of participants with Serious Adverse Events (SAEs)

7.2 Secondary Outcomes 1. Maximum observed plasma concentration (C_{max}) 2. Time of maximum observed concentration within a dosing interval (T_{max}) 3. Area under the concentration-time curve within a dosing interval (AUC[TAU])

8. Safety & Adverse Event Reporting

- **Adverse Event (AE) Monitoring:** Continuous recording from informed consent through the end of the safety follow-up period.
 - **Serious Adverse Events (SAEs):** Reported promptly to the sponsor within 24 hours.
 - **Data Monitoring Committee (DMC):** Utilized for dose-escalation clearance and periodic safety data review.
-

9. Statistical Analysis Plan (SAP) Summary

- **Analysis Populations:** Safety Population (all participants receiving ≥ 1 dose) and Efficacy Evaluable Population (those with measurable baseline disease and ≥ 1 post-treatment assessment).
 - **Sample Size Justification:** Target enrollment of 100 participants based on standard Phase 1/Phase 2 dose escalation design followed by cohort expansion into specific tumor types.
 - **Handling of Missing Data:** Participants with no post-baseline tumor assessments are generally considered non-responders in efficacy analyses.
-

10. Quality Assurance & Regulatory Compliance

- **GCP Compliance:** This study will be conducted in accordance with Good Clinical Practice (GCP) and the Declaration of Helsinki.
- **Monitoring Plan:** Routine onsite and remote monitoring managed by Bristol Myers Squibb.
- **Audit Trail:** eCRF locking and query resolution via validated data capture systems.

11. Study Identifiers & Governance

- **Primary ID:** CA120-1001
- **Registry Number:** NCT05888831
- **Posting ID:** 578703125872769480
- **Sponsor/Lead Organization:** Bristol Myers Squibb
- **Study Title:** A Study of BMS-986449 With and Without Nivolumab in Participants With Advanced Solid Tumors
- **Official Regulatory Title:** A Phase 1/2 Study of BMS-986449 Alone and in Combination With Nivolumab in Participants With Advanced Solid Tumors

12. Clinical Framework (Oncology Specific)

- **Disease Areas:** Advanced Solid Tumors / Advanced Solid Malignancies
- **Semantic Type:** Neoplastic Process
- **Preferred Name:** Advanced Malignant Solid Neoplasm
- **Preferred UMLS Name:** Metastatic Solid Neoplasm
- **Definition:** A malignant solid neoplasm that has spread extensively to other anatomic sites or is no longer responding to treatment.
- **Diagnosis Threshold:** Histologically or cytologically confirmed advanced, unresectable/metastatic
- **MeSH Code:** N/A
- **SNOMED ID:** 39958004
- **SNOMED Hierarchy:** 785317006 | Advanced solid malignant neoplasm | Advanced solid malignant neoplasm (disorder)
- **Medical Methodology:** Combination Immunotherapy / Targeted Therapy
- **Optimization Target:** Dose optimization and clinical benefit achievement

13. Study Procedures & Methodology

- **Management Pathway:** Phase 1/2 Dose Escalation and Expansion Protocol
- **Education Protocol (HCP):** Site Initiation and Protocol Training
- **Education Protocol (Patient):** Informed Consent and Dosing Instructions
- **Quality Audit Mechanism:** Centralized and Onsite Clinical Data Monitoring

14. Observation & Follow-Up Schedule

- **Total Duration:** Tracked until Estimated Study Completion in September 2026

- **Onsite Visit Cadence:** Corresponding to treatment cycles
- **Remote Monitoring Frequency:** As specified per sponsor's protocol
- **Checklist Review Interval:** End of each treatment cycle
