

1. Administrative & Study Identification

Full Study Title: Real-World Patients With Obstructive Hypertrophic Cardiomyopathy Treated With Mavacamten - a Single-Center Descriptive Study **Short Title/Acronym:** Mavacamten in Obstructive Hypertrophic Cardiomyopathy **Protocol Number:** CV027-1039 **NCT Number:** NCT07168655 **Sponsor Name:** Bristol Myers Squibb (BMS) **Investigational Product:** Mavacamten (Camzyos) **Phase of Development:** Not Applicable **Trial Status:** COMPLETED **Medical Monitor:** Bristol Myers Squibb Clinical Operations Lead

2. Study Synopsis & Rationale

2.1 Study Objective Primary Objective: To evaluate the real-world outcomes of individuals diagnosed with obstructive hypertrophic cardiomyopathy (oHCM) treated with mavacamten at the Hospital of The University of Pennsylvania in the US. **Secondary Objectives:** To describe patient characteristics and standard of care treatment patterns in a real-world setting.

2.2 Background & Rationale To address the need for real-world evidence (RWE) on the effectiveness and utilization of mavacamten in obstructive hypertrophic cardiomyopathy (oHCM) outside of controlled clinical trial environments. This helps to validate the benefits of myosin inhibitor therapy in standard clinical practice.

3. Study Design & Methodology

3.1 Design Framework Study Type: Observational (Real-World Outcomes / Descriptive Study) **Control Type:** Single-arm **Blinding:** Open-label (N/A for retrospective/observational) **Randomization:** N/A

3.2 Planned Enrollment & Duration Target \$N\$: 163 participants **Number of Sites:** 1 site (Hospital of The University of Pennsylvania, Philadelphia, PA, United States) **Estimated Study Start:** 21-Feb-2023 (Actual) **Estimated Primary Completion:** 31-Mar-2023 (Actual) (Note: Final Study Completion date was 25-Mar-2025)

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria 1. Age $\geq$ 18 years at index date. 2. Prescription of mavacamten for the treatment of Obstructive

Hypertrophic Cardiomyopathy (oHCM). 3. ≥ 4 weeks of follow-up after prescription of mavacamten.

4.2 Exclusion Criteria 1. Data collection as part of a clinical trial during the study period. 2. Current participation in a myosin inhibitor clinical trial.

5. Intervention & Treatment Plan

5.1 Investigational Regimen Dosage/Frequency: Mavacamten (Trade Name: Camzyos, ATC Code: C01EB24) prescription as per real-world standard of care. **Route of Administration:** Oral (Capsule). **Duration of Treatment:** Varied (≥ 4 weeks of follow-up post-prescription required).

5.2 Concomitant & Prohibited Therapy Permitted: Standard concomitant medications for oHCM and related co-morbidities as prescribed by the HCP. **Prohibited:** Concurrent participation in other myosin inhibitor clinical trials during the study period.

6. Study Timeline & Visit Schedule

Visit ID	Window (Days)	Key Activities/Procedures
Baseline (Index Date)	Day 0	Index prescription of mavacamten
Follow-up	≥ 4 weeks	Routine clinical evaluation, symptom assessment, standard echocardiography (per standard of care)
End of Study	Data Lock	EMR data abstraction, retrospective review of outcomes

7. Outcome Measures (Endpoints)

7.1 Primary Endpoints Definitions: 1. Participant New York Heart Association (NYHA) functional class. 2. Participant echocardiogram measurements: Left ventricular outflow tract (LVOT) gradient results at rest, Valsalva and post-exercise (if available). 3. Participant echocardiogram measurements: Left ventricular ejection fraction (LVEF) percentage. **Measurement Method:** Evaluation of Electronic Medical Records (EMR) at the Hospital of The University of Pennsylvania.

7.2 Secondary & Exploratory Endpoints Patient demographics, clinical characteristics, and long-term standard of care outcomes.

8. Safety & Adverse Event Reporting

Adverse Event (AE) Monitoring: Retrospective collection of documented adverse events from patient medical records. **Serious Adverse Events (SAEs):** Evaluated per real-world pharmacovigilance

and reporting standards. **Data Monitoring Committee (DMC):** N/A for single-center retrospective/observational study.

9. Statistical Analysis Plan (SAP) Summary

Analysis Populations: All eligible patients diagnosed with oHCM and treated with mavacamten meeting inclusion criteria (\$N=163\$). **Sample Size Justification:** Convenience sample based on available real-world prescription and follow-up data at the single study site. **Handling of Missing Data:** Standard observational methods without formal imputation unless explicitly specified in the real-world evidence protocol.

10. Quality Assurance & Regulatory Compliance

GCP Compliance: This study will be conducted in accordance with Good Pharmacoepidemiology Practice (GPP), real-world evidence guidelines, and local privacy regulations (e.g., HIPAA). **Monitoring Plan:** Data abstraction quality checks and source data verification against the hospital's Electronic Medical Record (EMR) system. **Audit Trail:** Secured, anonymized database with appropriate access controls.

11. Study Identifiers & Governance

Primary ID: {{CV027-1039}} **Registry Number:** {{NCT07168655}}
Sponsor/Lead Organization: {{Bristol Myers Squibb}} **Study Title:** {{Mavacamten in Obstructive Hypertrophic Cardiomyopathy}}
Official Regulatory Title: {{Real-World Patients With Obstructive Hypertrophic Cardiomyopathy Treated With Mavacamten - a Single-Center Descriptive Study}}

12. Clinical Framework (oHCM Specific)

Primary Condition: {{Obstructive Hypertrophic Cardiomyopathy (oHCM)}} **Diagnosis Threshold:** {{Clinical diagnosis of oHCM, age \$ \ge 18\$ years}} **Medical Methodology:** {{Guideline-directed medical therapy including myosin inhibitors}} **Optimization Target:** {{Real-world symptom improvement and LVOT gradient reduction}}

13. Study Procedures & Methodology

Management Pathway: {{Standard real-world clinical pathway for oHCM}} **Education Protocol (HCP):** {{Compliance with standard Mavacamten REMS program}} **Education Protocol (Patient):** {{Standard of care counseling for Mavacamten risks and benefits}}

Quality Audit Mechanism: {{Retrospective EMR data abstraction check}}

14. Observation & Follow-Up Schedule

Total Duration: {{\$\ge 4\$ weeks post-prescription minimum follow-up}} **Onsite Visit Cadence:** {{Determined by routine clinical standard of care}} **Remote Monitoring Frequency:** {{N/A - Observational Data Collection}} **Checklist Review Interval:** {{N/A - Retrospective/Observational Review}}
