

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Treating Atopic Dermatitis With Abrocitinib and Its Impact in Real Life: An Observational Cohort Study To Describe the Effectiveness of Abrocitinib in Patients With Moderate-to-Severe Atopic Dermatitis.
Short Title:	A Study to Learn About Abrocitinib in Adult Patients With Moderate to Severe Atopic Dermatitis.
Protocol Number:	1017249050785072541
NCT Number:	NCT05689151
Sponsor Name:	Pfizer
Investigational Product:	abrocitinib
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Proportion of patients with an Investigator's Global Assessment (IGA) score of clear (0) or almost clear (1) (on a 5- point scale) and a reduction from baseline of ?2 points
Secondary Obj.:	1. Proportion of patients with an Investigator's Global Assessment (IGA) score of clear (0) or almost clear (1) (on a 5- point scale) and a reduction from baseline of ?2 points 2. Change in Eczema Area and Severity Index (EASI) score from baseline 3. Proportion of patients with an EASI75 and EASI90

2.2 Background & Rationale

The purpose of this study is to learn about the safety and effects of Abrocitinib in the real-life clinical setting given for the treatment of moderate to severe atopic dermatitis. Atopic dermatitis, or AD, is a long-lasting disease that causes inflammation, redness, and irritation of the skin.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: RECRUITING
Target N:	183

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Patients older than 18 years of age at inclusion.
- * Patients with clinical diagnosis of moderate-to-severe chronic atopic dermatitis (also referred to as atopic eczema) at inclusion according to the investigator and eligible for abrocitinib according to its marketing approval.
- * Patients that have been informed of the study procedures and have signed the consent.

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.2 Exclusion Criteria

- * Patients for whom abrocitinib is contraindicated.
- * Patients unable to follow and respect the study procedures and judged inapt to respond to the questions required for the study due to linguistic, psychological, social, or geographical reasons.
- * Patients not affiliated to the French social security system.
- * Patients deprived of liberty, under guardianship, or unable to provide oral consent.
- * Patients participating in a clinical study assessing a medicinal treatment (patients can participate in registries and observatories).

11. Study Identifiers & Governance

Primary ID:	1017249050785072541
Registry Number:	NCT05689151
Sponsor:	Pfizer
Study Title:	A Study to Learn About Abrocitinib in Adult Patients With Moderate to Severe Atopic Dermatitis.

15. Sign-off & Approval

Principal Investigator: _____	Date: _____
