

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

## 1. Administrative & Study Identification

|                          |                                                                                                                                                                                                                                                                                                                                                                                       |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Full Study Title:        | A Phase 1, Two-Part, Double-blind, Placebo-controlled, Randomized Study of the Safety, Tolerability, and Pharmacokinetics of BMS-986278 (Part A) and a Randomized, Double-blind, Positive-controlled, Placebo-controlled, 4-Period Crossover, Thorough QT/QTc Study to Evaluate the Effect of Multiple Doses of BMS-986278 on Cardiac Repolarization (Part B) in Healthy Participants |
| Short Title:             | A Study to Investigate the Safety, Tolerability, and Pharmacokinetics of BMS-986278 and the Effects of BMS-986278 on Cardiac Repolarization in Healthy Participants                                                                                                                                                                                                                   |
| Protocol Number:         | 1023040159550428654                                                                                                                                                                                                                                                                                                                                                                   |
| NCT Number:              | NCT06746402                                                                                                                                                                                                                                                                                                                                                                           |
| Sponsor Name:            | Bristol Myers Squibb                                                                                                                                                                                                                                                                                                                                                                  |
| Investigational Product: | moxifloxacin                                                                                                                                                                                                                                                                                                                                                                          |
| Phase:                   | PHASE1                                                                                                                                                                                                                                                                                                                                                                                |
| Medical Monitor:         | [Not Provided in Posting]                                                                                                                                                                                                                                                                                                                                                             |

## 2. Study Synopsis & Rationale

### 2.1 Study Objective

|                    |                                                                                                                                                                                                                            |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Primary Objective: | 1. Number of participants with non-serious Adverse Events (AEs): Part A 2. Number of participants with Serious AEs (SAEs): Part A 3. Number of participants with AEs leading to study intervention discontinuation: Part A |
| Secondary Obj.:    | 1. Maximum observed plasma concentration (Cmax) 2. Time of maximum observed plasma concentration (Tmax) 3. Area under the plasma concentration-time curve from time zero to the end of dosing interval AUC(TAU)            |

### 2.2 Background & Rationale

The purpose of this study is to determine the safety, tolerability, and pharmacokinetics (PK) of high dose of BMS-986278 in healthy participants and to assess the effect of BMS-986278 on the ECG intervals in healthy participants.

## 3. Study Design & Methodology

|                   |                                                        |
|-------------------|--------------------------------------------------------|
| Design Framework: | Type: INTERVENTIONAL, Phase: PHASE1, Status: COMPLETED |
| Target N:         | 42                                                     |

## 4. Subject Selection (Eligibility Criteria)

### 4.1 Inclusion Criteria

- \* Female individuals not of childbearing potential (INOCBP) and males.
- \* Healthy as determined by medical history, physical examination, vital signs, 12-lead ECG, and clinical laboratory assessments.

# Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

\* Body mass index (BMI) 18.0 to 32.0 kg/m<sup>2</sup> , inclusive, for Parts A and B.

## 4.2 Exclusion Criteria

\* Any significant acute or chronic medical illness as determined by the investigator.

\* History of clinically relevant cardiac disease as determined by the investigator, symptomatic or asymptomatic arrhythmias, presyncope or syncopal episodes, or additional risk factors for ventricular arrhythmias.

\* Any significant history of disease of the cardiovascular system that in the opinion of the Investigator makes the participant unsuitable for enrollment into the study.

\* Other protocol-defined inclusion/exclusion criteria apply.

## 11. Study Identifiers & Governance

**Primary ID:** 1023040159550428654

**Registry Number:** NCT06746402

**Sponsor:** Bristol Myers Squibb

**Study Title:** A Study to Investigate the Safety, Tolerability, and Pharmacokinetics of BMS-986278 and the Effects of BMS-986278 on Cardiac Repolarization in Healthy Participants

## 15. Sign-off & Approval

Principal Investigator: \_\_\_\_\_ Date: \_\_\_\_\_

Clinical Operations Lead: \_\_\_\_\_ Date: \_\_\_\_\_

Lead Statistician: \_\_\_\_\_ Date: \_\_\_\_\_
