

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase I, Open-label, Multicentre, Study to Assess the Safety, Tolerability, Pharmacokinetics and Preliminary Efficacy of AZD2014 Administered Orally in Combination With Intramuscular (IM) Fulvestrant to Patients With Estrogen Receptor Positive (ER+) Advanced, Metastatic Breast Cancer
Short Title:	AZD2014 and Fulvestrant in Patients With ER+ Advanced Metastatic Breast Cancer
Protocol Number:	132817830602879682
NCT Number:	NCT01597388
Sponsor Name:	AstraZeneca
Investigational Product:	fulvestrant
Phase:	PHASE1
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Adverse Events 2. Adverse Events Leading to Dose Reduction of AZD2014 3. Clinically Important Changes in Haematology Parameters
Secondary Obj.:	1. AZD2014 Peak Plasma Concentration (Cmax) Following Single Dose, Fasted, no Fulvestrant. 2. Time to AZD2014 Peak Plasma Concentration (Tmax) Following Single Dose, Fasted, no Fulvestrant. 3. Area Under the Plasma Concentration-time Curve for AZD2014 From 0 to 12 Hours (AUC 0-12) Following Single Dose, Fasted, no Fulvestrant.

2.2 Background & Rationale

The purpose of this study is to assess safety and tolerability of AZD2014 when given in combination with Fulvestrant

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE1, Status: ACTIVE_NOT_RECRUITING
Target N:	99

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Provision of signed and dated written informed consent prior to any study specific procedures, sampling analysis
- * Aged at least 18
- * At least one lesion (measurable and/or non-measurable) that can be accurately assessed at baseline by computerised tomography (CT) magnetic resonance imaging (MRI) or plain X-ray and is suitable for repeated assessment
- * Histological or cytological confirmation of an ER+ advanced metastatic breast cancer tumour that is eligible for

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

treatment with fulvestrant

* Eastern Cooperative Oncology Group (ECOG) performance status of 0 or 1

* Patients must have evidence of non-child-bearing potential.

4.2 Exclusion Criteria

* Prior chemotherapy, biological therapy, radiation therapy, androgens, thalidomide, immunotherapy, other anticancer agents, and any investigational agents within 14 days of starting study treatment (not including palliative radiotherapy at focal sites)

* Major surgery within 4 weeks prior to entry to the study (excluding placement of vascular access), or minor surgery within 2 weeks of entry into the study.

* Patients with severe cardiac condition of ischemia, impaired ventricular function and arrhythmias, evidence of severe or uncontrolled systemic or current unstable or uncompensated respiratory or cardiac conditions.

* Patients with diabetes type 1 or uncontrolled type II (HbA1c $\geq$ 8% assessed locally)

11. Study Identifiers & Governance

Primary ID: 132817830602879682

Registry Number: NCT01597388

Sponsor: AstraZeneca

Study Title: AZD2014 and Fulvestrant in Patients With ER+ Advanced Metastatic Breast Cancer

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____
