

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Phase 1, Randomized, Double-Blind, Comparator-Controlled, Dose-Escalation Trial to Evaluate, Tolerability, and Immunogenicity of V540D in Healthy Adults.
Short Title:	A Trial to Evaluate Tolerability and Immunogenicity of V540D in Healthy Adults (V540D-004)
Protocol Number:	146486362752953607
NCT Number:	NCT06688058
Sponsor Name:	Merck
Investigational Product:	L1 protein, human papillomavirus type 18 vaccine
Phase:	PHASE1
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of Participants Who Experience a Solicited Injection-Site Adverse Event (AE): An AE is any untoward medical occurrence in a clinical study participant, temporally associated with the use of study intervention, whether or not considered related to the study intervention. 2. Number of Participants Who Experience a Solicited Systemic AE: Solicited systemic AEs include headache, fatigue, nausea, dizziness, muscle aches, joint pain. 3. Number of Participants Who Experience Immediate Reactions Occurring Within 30 Minutes After Any Vaccination: An AE is any untoward medical occurrence in a clinical study participant, temporally associated with the use of study intervention, whether or not considered related to the study intervention.
Secondary Obj.:	1. Total Immunoglobulin G (IgG) Geometric Mean Ratios (GMRs) for anti-HPV types 6, 11, 16, 18, 31, 33, 45, 52, and 58

2.2 Background & Rationale

Researchers are looking for new ways to prevent cancers related to human papillomavirus (HPV). HPV is a common virus that can cause an infection. There are many different types of HPV. Most people's immune system can fight HPV infection and it goes away without treatment. For some people, HPV infections can last longer and may cause cancer years later.

3. Study Design & Methodology

Design Framework:	Type: INTERVENTIONAL, Phase: PHASE1, Status: RECRUITING
Target N:	72

4. Subject Selection (Eligibility Criteria)

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.1 Inclusion Criteria

The key inclusion criteria include but are not limited to the following:

* Is in good health based on medical history, physical examination, vital sign (VS) measurements and electrocardiograms (ECGs) performed before randomization

4.2 Exclusion Criteria

The key exclusion criteria include but are not limited to the following:

* Has a history of abnormal Pap smears, HPV- related external genital lesions (eg, condyloma acuminata, vulval intraepithelial neoplasia (VIN), or prostatic intraepithelial neoplasia (PIN)) or external genital cancer (eg, penile cancer), HPV-related vaginal or anal lesions (eg, condyloma acuminata or vaginal intraepithelial neoplasia (VaIN)) or vaginal or anal cancer

* Has a history of cancer (malignancy)

* Has received any HPV vaccine or is expected to receive any HPV vaccine during the study, outside the protocol

11. Study Identifiers & Governance

Primary ID: 146486362752953607

Registry Number: NCT06688058

Sponsor: Merck

Study Title: A Trial to Evaluate Tolerability and Immunogenicity of V540D in Healthy Adults (V540D-004)

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____

Lead Statistician: _____ Date: _____
