

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Real-World Study of Ceftazidime-Avibactam to Characterize the Usage in Clinical Practice
Short Title:	Real-World Study of Ceftazidime Avibactam in China
Protocol Number:	255529375861257558
NCT Number:	NCT05487586
Sponsor Name:	Pfizer
Investigational Product:	ceftazidime
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Clinical Success Rate at Day 7: The clinical success rate was defined as the number of participants with clinical outcome as "success" in a specific visit / number of participants with clinical outcome assessed in a specific visit and was reported in terms of percentage of participants. Clinical outcome as success was defined as resolution of all signs and symptoms of infection such that no further antimicrobial therapy was necessary. 95% CI was based on Clopper-Pearson method. 2. Clinical Success Rate at Day 14: The clinical success rate was defined as the number of participants with clinical outcome as "success" in a specific visit / number of participants with clinical outcome assessed in a specific visit and was reported in terms of percentage of participants. Clinical outcome as success was defined as resolution of all signs and symptoms of infection such that no further antimicrobial therapy was necessary. 95% CI was based on Clopper-Pearson method. 3. Clinical Success Rate at Day 21: The clinical success rate was defined as the number of participants with clinical outcome as "success" in a specific visit / number of participants with clinical outcome assessed in a specific visit and was reported in terms of percentage of participants. Clinical outcome as success was defined as resolution of all signs and symptoms of infection such that no further antimicrobial therapy was necessary. 95% CI was based on Clopper-Pearson method.
Secondary Obj.:	1. Number of Participants According to Dose and Frequency of Ceftazidime-Avibactam: Full Analysis Set 2. Number of Participants According to Dose and Frequency of Ceftazidime-Avibactam: Clinically Evaluable Analysis Set 3. Duration of Exposure to Ceftazidime-Avibactam: Full Analysis Set

2.2 Background & Rationale

This observational study will enroll approximately 450 in patients. Patients treated with CAZ AVI for at least 1 dose at around 20 research centers in China will be enroll.

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

3. Study Design & Methodology

Design Framework: Type: OBSERVATIONAL, Status: TERMINATED
Target N: 220

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

Not Provided

4.2 Exclusion Criteria

Not Provided

11. Study Identifiers & Governance

Primary ID: 255529375861257558
Registry Number: NCT05487586
Sponsor: Pfizer
Study Title: Real-World Study of Ceftazidime Avibactam in China

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
Clinical Operations Lead: _____ Date: _____
Lead Statistician: _____ Date: _____
