

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	REal-World Application of Luspatercept in Adults With Transfusion-Dependent Beta-Thalassemia in the Middle East (RELATE): A Non-interventional Retrospective and Prospective Observational Study
Short Title:	A Real-World Study to Evaluate Luspatercept in Adults With Transfusion-Dependent Beta-Thalassemia in the Middle East
Protocol Number:	270112071640985543
NCT Number:	NCT07215975
Sponsor Name:	Bristol Myers Squibb
Investigational Product:	luspatercept
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Change in transfusion burden 2. Change in mean pre-transfusion hemoglobin level
Secondary Obj.:	1. Change in transfusion-related visits 2. Proportion of participants achieving ≥33% reduction in red blood cell (RBC) transfusion burden (number of RBC units transfused) plus a reduction of ≥2 units 3. Proportion of participants achieving ≥50% reduction in red blood cell transfusion burden plus a reduction of ≥2 units

2.2 Background & Rationale

The purpose of this study is to evaluate luspatercept treatment in adults with transfusion-dependent beta-Thalassemia in the Middle East

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: NOT_YET_RECRUITING
Target N:	200

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * Male or female participants of any race aged at least 18 years at time of initiation of luspatercept treatment
- * Participants with documented diagnosis of transfusion-dependent β -thalassemia (TDT).
- * Participants who have been initiated on treatment with luspatercept as per the product's Summary of Product Characteristics (SmPC) no longer than 12 months prior to informed consent signature, and for whom therapy is ongoing.
- * Participants for whom the decision to prescribe luspatercept treatment is clearly separated from the physician's decision to include the participant in the current study.

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

* Participants who have provided signed informed consent for participating in the study and for collecting and analyzing medical data pertinent to the objectives of this study

4.2 Exclusion Criteria

* Participants that meet any of the contraindications to the administration of luspatercept as outlined in the latest version of the locally approved SmPC.

* Participants who are currently receiving or are planned to receive treatment with any investigational drug/device/intervention or who have received any investigational product within 1 month or 5 half-lives of the investigational agent (whichever is longer) prior to luspatercept therapy initiation.

* Participants who are currently pregnant, breastfeeding, or planning a pregnancy during the study observation period.

* Participants who have not provided signed informed consent for participating in the study and for collecting and analysing medical data pertinent to the objectives of this study.

11. Study Identifiers & Governance

Primary ID: 270112071640985543

Registry Number: NCT07215975

Sponsor: Bristol Myers Squibb

Study Title: A Real-World Study to Evaluate Luspatercept in Adults With Transfusion-Dependent Beta-Thalassemia in the Middle East

15. Sign-off & Approval
