

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	VICTORIE (VTE In Cancer - Treatment, Outcomes and Resource Use In Europe)
Short Title:	Anticoagulation in Patients With Venous Thromboembolism and Cancer
Protocol Number:	310085220228349086
NCT Number:	NCT04618913
Sponsor Name:	Pfizer
Investigational Product:	dabigatran etexilate
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Recurrence of Thromboembolism: The follow-up period during which outcome events of interest will be identified will run from the day after the index date until the end of the data collection or death, whichever occurs first. As data are updated at different times and frequencies in the different study countries, the date of the end of data collection will be determined after the relevant permissions have been acquired from the respective authorities.
Secondary Obj.:	Not Provided

2.2 Background & Rationale

This study is a retrospective analysis of observational cohorts using data from prospectively collected administrative/claims data to investigate treatment patterns, healthcare resource utilisation (HCRU), direct and indirect costs (where feasible), and safety and effectiveness outcomes in patients with VTE and active cancer or patients with VTE and history of cancer who initiate anticoagulant treatment with a VKA, LMWH or NOACs.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: ACTIVE_NOT_RECRUITING
Target N:	1

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

- * A VTE diagnosis
- * Active cancer or history of cancer
- * Treatment with VKA, NOAC (apixaban, rivaroxaban, dabigatran, edoxaban) or LMWH
- * Age ≥ 18 years at the date of index VTE (Venous thromboembolic)

4.2 Exclusion Criteria

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

- * Prior VTE diagnosis
- * Diagnosis of prior atrial fibrillation
- * Inferior Vena Cava (IVC) filter
- * Prior exposure to (OAC) oral anticoagulation or (PAC)parenteral anticoagulation - note: Prophylactic use of (OAC)/(PAC) allowed.
- * Pregnancy
- * More than one (OAC) oral anticoagulation or (PAC) parenteral anticoagulation dispensed on the index date.
- * Patients with less than one day of follow up

11. Study Identifiers & Governance

Primary ID: 310085220228349086
Registry Number: NCT04618913
Sponsor: Pfizer
Study Title: Anticoagulation in Patients With Venous Thromboembolism and Cancer

15. Sign-off & Approval

Principal Investigator: _____ Date: _____
