

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	A Randomized, Double-Blind Study to Evaluate the Safety, Tolerability, and Immunogenicity of V118 Formulation E in Healthy Adults
Short Title:	A Study of V118E in Healthy Participants (V118E-003)
Protocol Number:	311987672409458874
NCT Number:	NCT07168915
Sponsor Name:	Merck
Investigational Product:	sodium chloride
Phase:	PHASE1
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Number of Participants With Solicited Injection-Site Adverse Events (AEs): An AE is defined as any unfavorable and unintended sign including an abnormal laboratory finding, symptom or disease associated with the use of a medical treatment or procedure, regardless of whether it is considered related to the medical treatment or procedure, which occurs during the course of the study. A solicited AE is a predefined event that participants are specifically asked about and record on their vaccine report card (VRC). Solicited injection-site AEs include redness, swelling, and pain or tenderness. The number of participants with a solicited injection-site AE will be reported. 2. Number of Participants With Solicited Systemic AEs: An AE is defined as any unfavorable and unintended sign including an abnormal laboratory finding, symptom or disease associated with the use of a medical treatment or procedure, regardless of whether it is considered related to the medical treatment or procedure, which occurs during the course of the study. A solicited AE is a predefined event that participants are specifically asked about and record on their VRC. Solicited systemic AEs include fever, muscle aches all over body, joint pain, headache, and tiredness. The number of participants with a solicited systemic AE will be reported. 3. Number of Participants With Immediate AEs Following Vaccination: An AE is defined as any unfavorable and unintended sign including an abnormal laboratory finding, symptom or disease associated with the use of a medical treatment or procedure, regardless of whether it is considered related to the medical treatment or procedure, which occurs during the course of the study. The number of participants with immediate AEs following vaccination will be reported.
Secondary Obj.:	1. Serotype-specific Immunoglobulin G (IgG) Geometric Mean Concentrations (GMCs) 2. Change From Baseline in Serotype-specific IgG GMCs

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

2.2 Background & Rationale

Researchers are looking for new vaccines to prevent illnesses caused by a type of bacteria called *Streptococcus pneumoniae*. There are many different types of *Streptococcus pneumoniae* bacteria, called serotypes. Vaccines contain small parts of certain serotypes. These parts will not cause an infection but help the body create antibodies (proteins) to fight the bacteria.

3. Study Design & Methodology

Design Framework: Type: INTERVENTIONAL, Phase: PHASE1, Status: RECRUITING

Target N: 126

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

The main inclusion criteria include but are not limited to the following:

↳ Is in good health before randomization

4.2 Exclusion Criteria

The main exclusion criteria include but are not limited to the following:

- * Has a history of invasive pneumococcal disease or known history of other culture-positive pneumococcal disease within 3 years prior to receiving study vaccination
- * Has a history of clinically significant endocrine, gastrointestinal (GI), cardiovascular, hematological, hepatic, immunological, renal, respiratory, genitourinary, or major neurological (including stroke and chronic seizures) abnormalities or diseases

11. Study Identifiers & Governance

Primary ID: 311987672409458874

Registry Number: NCT07168915

Sponsor: Merck

Study Title: A Study of V118E in Healthy Participants (V118E-003)

15. Sign-off & Approval

Principal Investigator: _____ Date: _____

Clinical Operations Lead: _____ Date: _____

Lead Statistician: _____ Date: _____
