

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	CORRELATE-UK: COnsistency of Response With RimegEpant Oral Lyophilisate in Acute Treatment of migrainE in the United Kingdom
Short Title:	Consistency of Response With Rimegepant in Acute Treatment of Migraine
Protocol Number:	316245311525200873
NCT Number:	NCT06898047
Sponsor Name:	Pfizer
Investigational Product:	rimegepant
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. Time to Meaningful Pain Relief (MPR) post-dosing: Proportion of participants who report MPR: within 1 hour post dose; 1-2 hours post dose; Over 2 hours up to 4 hours post dose; More than 4 hours post dose; who have not achieved MPR and took the medication more than 2 hours before completing the survey; who have not achieved MPR and took the medication less than 2 hours before completing the survey
Secondary Obj.:	1. Time to improvement in non-pain symptoms post-dosing 2. Acute migraine treatment optimization 3. Acute migraine treatment optimization

2.2 Background & Rationale

This is a non-interventional, prospective study that will enroll participants with migraine in the United Kingdom currently in use of rimegepant to acutely treat migraine attacks. Participants will be followed up for up to 12 weeks and will complete a daily questionnaire to self-report the consistency of response to rimegepant in acute treatment of migraine.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: NOT_YET_RECRUITING
Target N:	250

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

Not Provided

4.2 Exclusion Criteria

Not Provided

11. Study Identifiers & Governance

Clinical Study Summary Report (CSSR)
