

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	Satisfaction and Treatment Experiences With RitlEcitiNib And Traditional Treatments for Severe Alopecia Areata Among Adults in the United States (SERENATA)
Short Title:	A Study to Learn About the Medicine Called Ritlecitinib in Adults With Severe Alopecia Areata in Real-world Settings
Protocol Number:	346815912907332413
NCT Number:	NCT07200128
Sponsor Name:	Pfizer
Investigational Product:	ritlecitinib
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. % of patients for whom their clinician was "satisfied" with current control of alopecia areata 2. % of patients with clinician-assessed mild, moderate, or severe disease 3. % of patients with clinician assessed progressive, stable, or improving disease
Secondary Obj.:	Not Provided

2.2 Background & Rationale

This study is a secondary analysis of the Adelphi Real World Alopecia Areata II United States Disease Specific Programmes database. This database contains data from a cross-sectional study capturing linked physician and patient survey data for dermatologists who treat alopecia areata and patients diagnosed with alopecia areata in the United States. The retrospective analysis of these data will evaluate experiences of patients and dermatologists receiving/prescribing ritlecitinib for severe alopecia areata in the United States. Specifically, the study will describe characteristics of patients who received ritlecitinib for severe alopecia areata, including demographics, clinical characteristics at the time of starting ritlecitinib, and their alopecia areata-related treatment history. The study will also report dermatologist satisfaction with treatment and change in the patient's alopecia areata severity and disease activity from the start of ritlecitinib to different time points on treatment.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: COMPLETED
Target N:	123

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

Not Provided

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

4.2 Exclusion Criteria

Not Provided

11. Study Identifiers & Governance

Primary ID:	346815912907332413
Registry Number:	NCT07200128
Sponsor:	Pfizer
Study Title:	A Study to Learn About the Medicine Called Ritlecitinib in Adults With Severe Alopecia Areata in Real-world Settings

15. Sign-off & Approval
