

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

1. Administrative & Study Identification

Full Study Title:	An Observational Multi-Country Post-Authorisation Safety Study to Evaluate the Risk of Serious Adverse Cardiovascular Events in Adolescent and Adult Patients With Severe Asthma Taking Tezepelumab
Short Title:	Tezspire Cardiac Events PASS
Protocol Number:	350055659538748224
NCT Number:	NCT06951867
Sponsor Name:	AstraZeneca
Investigational Product:	tezepelumab
Phase:	Not Applicable
Medical Monitor:	[Not Provided in Posting]

2. Study Synopsis & Rationale

2.1 Study Objective

Primary Objective:	1. composite outcome MACE: The primary outcome of interest is the composite outcome MACE, consisting of non-fatal myocardial infarction, non-fatal stroke, or cardiovascular death.
Secondary Obj.:	1. composite of four serious adverse cardiovascular events

2.2 Background & Rationale

The aim of this study is to evaluate the risk of serious adverse cardiovascular events in adolescent and adult patients with severe asthma taking tezepelumab compared to a population receiving standard of care treatment for severe asthma.

3. Study Design & Methodology

Design Framework:	Type: OBSERVATIONAL, Status: RECRUITING
Target N:	95574

4. Subject Selection (Eligibility Criteria)

4.1 Inclusion Criteria

* patients with a diagnosis of asthma receiving tezepelumab or high-intensity SOC treatment for severe asthma at any point during the study inclusion period.

Exclusion Criteria for both exposed and unexposed groups include:

- * <12 months of data availability prior to index date,
- * age <12 years at index date,

Clinical Study Summary Report (CSSR)

Document Status: Final | Version: 1.0 | Date: 01-APR-2026

* history of congenital heart disease or heart transplant outcome-specific exclusion criterion applied for each objective will include the presence of non-fatal myocardial infarction or stroke and the specific outcome of interest in the 180 days prior to index date

* for comparative analysis, an additional exclusion criterion will be considered, i.e. exposure to non-tezepelumab biologics on index date or within the 5-half-life clearance period of the biologic

* matching criteria (including, among other variables, the type and duration of SOC exposure in the 12 months before index date and propensity score \[PS\] matching) will be applied to ensure exposed and unexposed patients' comparability

4.2 Exclusion Criteria

Not Provided

11. Study Identifiers & Governance

Primary ID: 350055659538748224
Registry Number: NCT06951867
Sponsor: AstraZeneca
Study Title: Tezspire Cardiac Events PASS
